

Subject: Press Release

Got Web Host Adds High Bandwidth Virtual Plans

For Immediate Release

Wheatfield, IN

January 11, 2007

Got Web Host is happy to announce the addition of High Bandwidth Dedicated and Virtual Hosting packages to our vast selection of available hosting plans. Our [High Bandwidth Virtual Hosting](#) begins as low as \$40 a month, with no setup fees.

Director of Marketing & Support, Tanya Martin, said of the new options, "We have grown significantly over the past year, and felt it was time to provide hosting for clients that were not necessarily seeking the SEO packages that we specialize in."

Lloyd Brown, Director of Business Development, stated, "Got Web Host took a poll of potential customers that were not currently using our service. It was determined that the amount of bandwidth available in hosting plans was a primary consideration in choosing a host. We have the ability to provide bandwidth at a very competitive rate, and have set up all High Bandwidth Virtual Plans so that no one pays more than \$.35 a gig, with our largest virtual hosting plan providing bandwidth at a mere \$.15 per GB."

"Each high bandwidth virtual plan comes with two dedicated IP's, unlimited domains, and unlimited MySQL databases" said Martin. "With virtual hosting packages ranging from 100 to 800 GB per plan, we feel we now offer hosting suitable for any customer."

Brown commented, "We recently upgraded our Standard Value Dedicated servers to include more bandwidth and better hardware overall. We feel that with these additions and upgrades, Got Web Host is poised to make a greater impact in 2007."

"Our Standard Value Dedicated Servers include 2 IP's and up to 120 GB of storage with 900 GB of transfer," Brown added.

Got Web Host provides [SEO web hosting plans](#) for companies concerned with Google's host crowding penalties associated with search engine optimization. Got Web Host offers Multiple Class C IPs to their users. Many companies specializing in SEO have requested or searched for hosting that provided this type of service, we bring it to you with many different packages.

Got Web Host's hosting plans include the following features:

- High Bandwidth Virtual hosting with up to 10 GB of storage and 800 GB of transfer.

- [Standard Value Servers](#) with dedicated servers beginning as low as \$149 a month.

About Got Web Host:

[Got Web Host](#) has been hosting websites since 2002. As times change, hosting needs change as well, to which we strive to bring the best hosting solutions to meet these changes.

Multiple Class C IPs are difficult, if not impossible to find with most hosting companies. Many simply cannot provide multiple dedicated IPs. Got Web Host now offers Multiple Class C IPs to their users.

Several hosting companies are now attempting to break into this market. Got Web Host not only offers the service, but also understands why you need it and we bring it to you with many different packages.
