IS YOUR
SECURITY
SLEEPING ON THE JOB?

PUT SOME TEETH INTO YOUR WI-FI AND NETWORK SECURITY

with "The Worlds Best Security System" for protecting
information in motion.

Your data and your clients' data is at risk every time you use broadband or Wi-Fi. But you don't need to worry anymore. Protexx and HP are committed to providing you with a secure computing environment that is inexpensive and unhackable by today's standards.

The new HP Integrity servers deliver flexible computing capacity that automatically adapts to your changing business needs. Add Protexx "information in motion" encryption products and services and you'll be able to build a robust end-to-end data security architecture that protects your data from hackers and identity thieves.

By adding a Protexx Biometric Clip Drive for three factor authentication, you can comply with HIPAA, Sarbanes Oxley and Gramm Leach Bliley security requirements by encrypting all of your data as soon as you hit enter or send and securing them with your personal fingerprint. Furthermore, the HP Super-Scalable Processor Chipset sx2000 enables HP Integrity servers to deliver up to 30% more computing capacity. Such performance increases will lower your costs through greater bandwidth, enhanced availability, and better manageability.

"Protexx—the information security dog with real teeth"

Find out how Protexx and HP Integrity servers can slash your computing costs while improving your IT security and performance by calling 888-214-3294 today.

**CAN YOU
AFFORD TO TRUST
YOUR CRITICAL INFORMATION
TO A TIRED
OLD DOG?**

PUT SOME TEETH INTO YOUR WI-FI AND NETWORK SECURITY

with "The Worlds Best Security System" for protecting
information in motion.

When you or your employees use laptops and Wi-Fi, your data is at risk. Today's mobile workforce requires more secure computing power and system flexibility than ever. The solution is our 2048 bit rotating cipher encryption, which is both inexpensive and unhackable by today's standards. For security with bite, upgrade to Protexx biometrics and encryption solutions running on reliable HP Integrity servers.

Whether you are looking for a VPN, secure email, file transfers, secure IM or secure and anonymous Internet access across your mobile workforce, Protexx and HP help you solve all of your security requirements. Flexible capacity, secure availability and simplified management help you adapt quickly to new business security demands, like improved application performance and system uptime. Protexx's and HP's integrated solutions for secure availability support continuous business operations and protect your IT environment from intruders at every level.

Is this the dog,
you want to
guard
your vital information?

Put some teeth into your Wi-Fi and Network security

with "The Worlds Best Security System" for protecting
information in motion.

Today's business demands for remote connectivity with laptops and Wi-Fi puts your valuable data at risk. Don't trust your security to small, ineffective solutions. You need the Protexx 2048 bit rotating cipher encryption. Add the reliability of HP Integrity servers and you get a powerful, secure infrastructure that lets you do more for less.

Whether you need a VPN for handling remote employees and customer access, Wi-Fi security, secure email, secure e-commerce, secure instant messaging or file transfers, Protexx and HP provide flexible capacity, secure availability and simplified management. That means you can react quickly to changing business demands, maintain productivity and cut management costs.
