# NSS NETWORK SECURITY SOLUTIONS 'REST ASSURED'

# ABOUT US

Network Security Solutions (NSS MSC Sdn. Bhd.) was founded by Jagdeep Kairon and Scott Graham in Pune, India in 2000. NSS later relocated its headquarters in 2003 to the Multimedia Super Corridor in Malaysia while maintaining its operations in India.

A pioneer pure-play Infosec company in the year 2000, NSS has grown at the rate of 300% every year both in terms of revenue and clientele over the last 5 years. It now stands as one of Asia's leading Information Security Companies.

Today, NSS is well known for introducing cutting edge products and providing high end consultancy services to organisations across different industries. The Company offers a full range of eSecurity Consulting, Training and Customised Technology solutions to Government and Corporate clients worldwide. NSS has over 300 corporate and 30 government clients.

One of the leading Information Security Management System consulting and services provider, NSS is the first in the ASEAN region to have successfully converted its BS7799-2 certification to ISO/IEC 27001:2005 in April 2006.

NSS currently has projects in Malaysia, India, Singapore, USA, UK, Dubai, Sri Lanka, Hong Kong, China, Thailand, Japan, Austria, Sweden, Finland, Indonesia, Philippines, Jordan, Norway and Cyprus.

CERT NO: IS 85834  
ISO 27001:2005

## CONSULTING SERVICES

As organisations embrace latest technologies in rolling out IT enabled systems, security, privacy concerns as well as regulatory compliance are issues that need immediate action.

Information is vital and constitutes an important asset for any company. Information security has always been a major challenge to most organisations. Information security is more than a simple matter of technology. In reality, it should be part of an ongoing risk-management process, covering all of the information that needs to be protected.

NSS provides tailored security solutions for small to large organisations, telecommunication companies and governments.

NSS possesses proven competence in Information Security Risk Analysis and Management which is backed by an unprecedented resource pool of talent and experience in Network Security, Information Risk Management, Privacy Protection, Incident Response, Information Security training, Risk Mitigation and Damage Limitation

## NSS SERVICE OFFERINGS

NSS brings to its clients a complete suite of security consulting services, enabling them to make informed decisions to safeguard their interests.

These include:

- **Application Security**
- **Business Continuity & Disaster Recovery (BCP & DR)**
- **CSIRT / CERT Setup**
- **Digital Forensics**
- **Digital Rights Management Consulting**
- **Host Hardening Services**
- **Information Security Policy Development**
- **Infrastructure Security Services**
- **ISO 27001 Consulting**
- **Security Architecture Review**
- **Technical Security Assessment**

## TRAINING

All the major economies in the World are moving from the Industrial age to the Information age, it's known as k-based or knowledge based economy. The issue for corporate and governments worldwide is to figure out ways to sustain a competitive advantage in this rapidly changing arena.

To take proactive measures and protect a company's information systems is a job which requires understanding of core issues in IT security. It can range from Corporate IS Awareness Training down to Technical Penetration Testing Training such as CPTP.

As organisations are looking forward to attaining information security certifications such as ISO27001,

there will be a demand for professionals who are well trained on the subject matter so as to implement and audit such certification requirements.

### NSS Training Offerings

- **CIW Security Analyst**
- **IS Awareness Training**
- **Certified Penetration Testing Professional (CPTP)**
- **Certified Network Security Administrator (CNSA)**
- **ISO 27001 Training**
- **Customized Training**
- **Security Certified Network Architect (SCNA)**
- **Security Certified Network Professional (SCNP)**

## OUR PRODUCTS

NSS offers an innovative range of security products for both personal and corporate users in every major market segment. Our products address the following security and network management areas:

Xecure Message Service (XMS) is the backbone technology developed by NSS to enable end-to-end security in mobile text messaging. It ensures text messages in transmission and at rest are protected hence offering complete privacy with high-level of security for both businesses and persona. As a NSS proprietary application, XMS is arguably the first end-to-end secure SMS solution. It is essentially an Advanced Encryption Standard (AES) based encryption solution that works on public-private keys generated by Elliptical Curve Cryptography (ECC) whose key strengths can be selected as 128 bits, 192 bits or 256 bits.

### XMS Product Suite:

- **PrivateXMS**
- **CellSniper**
- **XMS Manager**
- **Xecure Messaging Centre**
- **XMS Mobile Banking**
- **XMS Anti Identity Theft Solutions**

## ROCK VPN

The ROCK VPN product range works seamlessly with other network security technologies such as fire-walling, content scanning, anti-spam solutions, anti-virus scanners, intrusion detection/prevention systems and other appropriate technologies.

## Rock VPN Product Suite

- Rock VPN Appliance
- Rock Central Manager
- Rock Roamer Client
- Rock Workstation Protector
- Rock Server Protector
- Rock Gateway Protector
- Custom Crypto API and Software Development Kit
- Signature API and Software Development Kit

## PARTNERS

As part of our commitment to providing quality solutions, we have strong partnership with industry leading partners. The NSS partner network is built up of specialists from telecommunications, financial and information security sector. This network gives NSS the ability to leverage on the collective knowledge base and experience to offer our customers with complete, pervasive and standards compliant solutions.

NSS in house expertise will support its partners in all stages during the partnership development as well as in any professional training projects.

Partnering with NSS will give you the edge in providing improved and refined products and services to your valued customers in the arena of mobile commerce, financial transactions and information security.
