Love is in the air...and in the water too!

Conscious company goes mainstream with positive energy water for the planet.

With Valentine's day just around the corner, love is in the air, and in the water, too. H2Om LLC, the producers of H2Om water with intention, announced exciting details regarding the expanded distribution and availability of the world's first "interactive" natural spring water.

Infused with energy through words, music and the power of your own thoughts and intentions, H2Om's line of seven varieties of water have gained the attention of celebrities, philosophers, and scientists from across the globe. Their "Love" variety was recently voted one of the top 5 great enhanced waters by InStyle.com. H2Om's business model shares the philosophy and science made famous by the films "What the Bleep Do We Know" and "The Secret". Flowing in alignment with authors Dr. Wayne Dyer, Deepak Chopra, and Dr. Masaru Emoto, H2Om supports the concept that what you focus your mind, emotions and intention towards, will become your reality. This awareness has recently surged in popularity and has reached mainstream television programs such as Larry King Live and Oprah.

H2Om has created a line of seven interactive infusions, Love, Perfect Health, Gratitude, Prosperity, Will Power, Joy and Peace, and is now available at southern pacific Whole Foods markets and health food stores, as well as nationwide online.

"This expanded distribution is perfect timing for Valentine's Day. If bottled water is the new accessory, then every woman would love receiving a dozen roses and two dozen bottles of H2Om's Love variety spring water. It's literally the thought that counts and our slogan 'Think it while you drink it'® sets the perfect tone." said Sandy Fox vice president and marketing director.

"Besides being delicious natural spring water, H2Om empowers you to focus your thoughts on positive energy. Use the words, symbols and colors on the label as the driving force in creating your own intention. Envision what you desire to create in your life, then drink in those thoughts while you hydrate. The results are truly amazing." said Lex Lang H2Om's CEO.

But H2Om is more than just love at first sip. In alignment with its vision to work alongside non-profit organizations which strive to create positive change on our planet, H2Om is dedicated to its continued support of funds, charities, and events which inspire social and environmental awareness, solution building, and the long term protection and enhancement of our natural environment.
