*And we will help you to get there...*

## 02 About USONYX

USONYX ([www.usonyx.net](http://www.usonyx.net)) is Asia's leading Broadband Web Hosting Service Provider for small to medium-sized enterprises (SMEs). The USONYX.net platform which is built on the state-of-the-art Singapore ONE broadband backbone, offers secure, reliable and comprehensive Shared, VPS and Dedicated web hosting solutions with unmatched price plans... USONYX's world-class, fully-automated infrastructure, broadband network and technical support enable customers to develop and sustain strong web and email strategies without costly investment in hardware, software and IT staffing.

« USONYX has opened the door for SMEs to fully harness the Singapore ONE broadband network. Its affordable world-class hosting plans will definitely strike a chord with SMEs in Singapore. »

*Mr. Mock Pak Lum, CEO of 1-NET*

Founded in 2002, USONYX is a privately funded and profitable business which has grown to be one of the most respected hosting providers in South East Asia. As Microsoft's Certified Partner in Networking Infrastructure Solution, USONYX provides the highest level of technical expertise, strategic thinking and hands-on skills to customers. USONYX has also been recently acknowledged as SWsoft's Platinum Partner for its significant commitment to SWsoft technology and actively going-to-market with SWsoft. Headquartered in the International Plaza in downtown Singapore, USONYX provides services to over 2,500 business customers who rely on the organisation's transparent and helpful services..

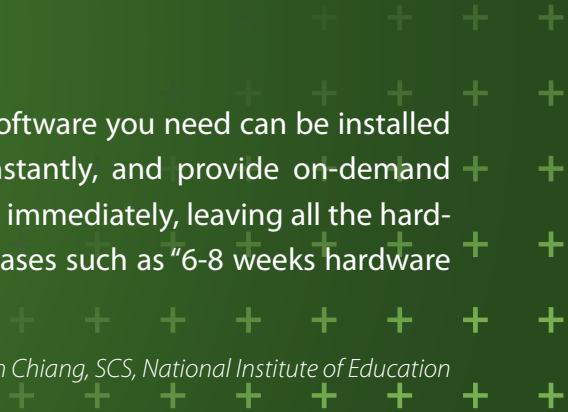

USONYX is the first web and email hosting provider in Singapore to use a revolutionary, fully automated web hosting platform, powered by SWSOFT's HSPcomplete hosting automation solution and Virtuozzo technology to provide virtualized hosting services. All shared hosting services are powered by an industry recognized Plesk Server Administrator system.

...secure, reliable and comprehensive **web hosting solutions** with unmatched performance for price!

Leveraging on the latest hosting technologies, the Singapore ONE broadband network and 1-Net datacenter infrastructure; USONYX provides an opportunity for SMEs to tap into the advantages that large corporate customers enjoy without the burden of cost, time or resource.

Web hosting allows SMEs to enjoy the competitive advantage of building powerful interactive web content such as Flash animation, audio and video-enhanced content and upload online presentation files on their web sites. With multiple tier 1 Internet connections, SMEs and their customers will enjoy faster data download, web content and email. These benefits enhance staff productivity and also ensure a better web experience for customers visiting the company's web site. Such are the advantages enjoyed by more than 2,500 and growing USONYX customers who have signed on the organisation's services and solutions since the launch of its web hosting plans in 2002.

« The virtual server is like a real server...Any software you need can be installed right away. The virtual server is provisioned instantly, and provide on-demand resources. So you could start your project almost immediately, leaving all the hardware and software worries behind. No more phrases such as "6-8 weeks hardware delivery"... »

*Mr. Tan Hoon Chiang, SCS, National Institute of Education*

## 03 Products

USONYX.NET's Virtual Private Servers (VPS) that are powered by SWsoft's Virtuozzo technology, are secure, reliable, feature-packed and most importantly, have enabled USONYX to offer broadband web hosting plans with unmatched price plans in terms of valued-added features and services.

USONYX's fully-automated and easy-to-use hosting management system is a first of its kind in Singapore enable customers to control web and email servers, and update parameters 24X7 and in real-time. SMEs will not need to incur additional costs of contracting an IT administrator to manage their web and email servers.

USONYX's product offerings include a full range of hosting products starting from one of the most valued plans in Singapore — the S\$8.88/month Shared hosting plan, six VPS hosting plans that are available on Linux and Windows and a recent addition to the USONYX Dedicated Servers line - the Dynamic Dedicated Servers. In addition,, USONYX provides domain registration services, Web site design, email and e-commerce solutions.

...secure, reliable,  
feature-packed!

USONYX is more than just a collection of web hosting products. As a USONYX customer, you are not only signing up for a fully featured product solution, but also for a peace of mind as USONYX is committed to providing secured and reliable services and solutions. The latest SWsoft's server virtualization and automation technologies, together with great technical support backup ensures that you will be enjoying full confidence of USONYX's solution and service packages.

# 04 Advantages

## Why choose USONYX?

There are few choices when it comes to picking a good hosting provider in Singapore. However, when you add up all the facts, the choice becomes clear. Discover why USONYX is the right choice:

### 1. *Microsoft Certified Partner*

USONYX is a Microsoft Certified Partner in Networking Infrastructure Solutions, an indication of our ability to provide services and solutions of the highest industry standards for you. You are also guaranteed to enjoy ultimate security and reliable when you subscribe to our web hosting and server solutions.

### 2. *SWsoft's Platinum Partner*

We have achieved SWsoft's Platinum Partner status, a true testimony of our substantial commitment to SWsoft technology and consistent go-to-market efforts with SWsoft.

### 3. *Trusted by over 2,500 and growing SMEs in Singapore and SEA*

USONYX's number one asset is our growing base of loyal customers. Small and medium enterprises, schools, universities, individuals and families rely on us to provide secure, reliable and value-rich hosting services.

### 4. *24x7 Live Emergency Support*

Superior 24x7 live emergency support sets us apart from the "small-budget" Web hosters. We pride ourselves on offering reliable, 24/7 live emergency support on our web site. We will be there for you in times of emergencies!

### 5. *Fast and reliable DELL servers*

There is a good reason why we do not assemble and repair servers internally — we believe that it's impossible to do this job better than DELL. Their Power Edge servers are designed to deliver exceptional levels of availability, manageability, performance, and scalability in a rack-dense, space-saving solution.

### 6. *Latest and easy-to-use web technologies*

USONYX is always using the latest technologies and solutions to solve customer needs. Our infrastructure is virtualised and utilizes industry awarded software: Virtuozzo, Plesk and HSPComplete. We are constantly exploring the use of latest technologies to serve you better.

7. *Broadband connection to Singapore ONE*

Singapore ONE is a national broadband network, which consists of high capacity ATM networks and switches that cover over 99% of the island with access via ADSL, cable, wireless, and fibre. It carries voice, data, audio, and video information simultaneously and at high speed to all local ISPs and their users: homes, businesses, schools, and other public places throughout the country. Direct link to this network guarantees fast and reliable access to your web site and delivery for your email.

8. *Hosted by 1-Net data centre in Singapore*

The 1-Net data centre sits directly on the Singapore ONE backbone and offers a state-of-the-art environment designed specifically for Internet Service Providers. The facilities include a world-class 24x7 Network Operation Centre managed by experienced network and system engineers and support staff, the very professionals who manage the Singapore ONE broadband backbone.

9. *Full range of hosting services*

From low cost shared hosting to dedicated servers, USONYX is right there with the support and additional services you might need.

10. *Affordable subscriptions from S\$8.88/month*

Most of our hosting plans are packed with the features and services that you won't find anywhere else, thanks to the latest hosting technologies and HSPComplete automation system we use. USONYX proves that saving money doesn't mean having to settle for anything less.

11. *Free Integrated Firewall, Anti-Virus, Anti-Spam*

Every shared and VPS hosting plan we provide comes with integrated Firewall, Anti-Virus and Anti-Spam protection. The safety and reliability of your web and email services is of paramount importance to us.

12. *Free Automated Daily Backup*

In addition to fault-tolerant disk storage that we use for our shared and VPS hosting plans, We do daily backups of your web site content and email boxes using dedicated backup servers. In case of emergencies or any other reasons, we can thus quickly and completely restore your domain data. You may also request CD/DVD backup of your data to be mailed to you every month for archiving purposes.
