

#1 in "Top 10 Offshore: Eastern/Central Europe"
Ranked globally in "Top 10 Specialty Application Development"

EPAM Systems Company Profile

EPAM Systems independently rated #1 in "Top 10 Offshore: Eastern/Central Europe" and ranked globally in "Top 10 Specialty Application Development" within the "Top 50 Best Managed Outsourcing Vendors" list provides software application development, re-engineering, implementation, maintenance and support services for clients globally. The company's 2500-strong offshore development centers located across Hungary, Russia, Ukraine and Belarus work in synergy with the client facing support and delivery operations in US, UK and Germany.

EPAM removes the potential risks from outsourcing by having the most mature and proven methodology and processes, further securing your value by being the largest, most experienced and most financially stable provider in the region.

Clients can choose from several tailored delivery models to provide the perfect fit for their specific technology and contractual needs from the outsourcing partner that guarantees the best possible return on their investment.

Combining the best development processes, the leading horizontal technology expertise with proven vertical domain knowledge, gained from complex projects for our globally recognized clients, EPAM is the most balanced choice to ensure your outsourcing goals are achieved.
