

#1 in "Top 10 Offshore: Eastern/Central Europe"
Ranked globally in "Top 10 Specialty Application Development"

EPAM Project Management Center

EPAM Project Management Center (PMC) is the world's leading distributed development project management tool. This web-based solution provides unmatched transparency into distributed development processes by controlling resources, risks and quality assurance.

Solution Focus

- Deploys international standards and industry proven best practices in IT project management
- Optimizes all core project development processes by connecting most valuable corporate resources: people, information, money
- Ensures adherence to project and staffing plans, milestones and deliverables, budget and quality
- Incorporates the extensive experience of EPAM Systems in managing complex IT projects for Fortune 2000 & Blue Chip companies in over 30 countries worldwide

EPAM PMC Differentiators

- Support for all stages of the software project lifecycle
- Outstanding build and release management
- Robust workbench for every project team member
- Company-wide collaboration environment
- Critical integration with the client team
- Global resource management for geographically distributed companies

"EPAM PMC was a key factor in the success of our software development and testing process. It allowed us to work seamlessly with team members in other locations to communicate requirements, track results and status and resolve bugs quickly. PMC proved to be a robust, easy to use tool to manage the complexity of custom software development across geographies and time zones."

Andrew Pfaff,
Madison Consulting Group

"EPAM PMC is robust enough to influence a company's decision to choose EPAM. EPAM's system facilitates the entire project cycle and is well integrated."

Global Services magazine
February, 2006

Key Features

- Web-based application with a secure login procedure
- Personalized role-based customer and team access to up-to-date project information
- Dynamic project requirements modification
- Document management and knowledge base repository
- Comprehensive risk management approach
