SCRIP PLUS® Secure Prescription Solution

High Security Thermal Rolls for the Star Micronics Printer

A Cost-effective Solution to Help Reduce Prescription Fraud and Improve the Quality of Patient Care

With US prescription fraud estimated at more than $5 billion annually, it's no wonder state governments are enacting legislation to deter counterfeiting and forgery. Concurrently, healthcare providers and pharmacists have been under increasing pressure from consumers, legislators and insurance organizations to improve the efficiency and quality of their services.

That's why more and more providers are seeking more secure, efficient methods of handling prescriptions. Many practitioners have turned to e-prescribing. However, choosing the right software is only the first step.

Support your E-Prescription Investment

Now, Standard Register and Star Micronics have partnered to help you deter prescription fraud while improving the quality and efficiency of your patients' care. We have paired the most secure thermal prescription roll with the most advanced direct thermal technology to help you realize the full value of your e-prescribing investment. This total solution significantly reduces your prescribing costs while helping address the systemic problems that can lead to adverse drug events.

Managing the documents you can't live without℠

Deter Fraud, Reduce Liability

Scrip Plus® Secure Thermal Rolls provide an unparalleled level of security. With multiple security features layered into your prescription stock, you can deter alteration and counterfeiting that can lead to drug diversion and professional liability.

- **Color-shifting Ink** – Exposed to the warmth of a hand or breath, this feature offers an easy means for the pharmacy to verify the authenticity of your prescription.

- **CopyBan Capture®** – Our patented background design deters counterfeiting attempts using today's high-end copiers and scanners. The word "VOID" appears in any scanned or copied image.

- **Chemical "VOID"** – Attempts to alter a prescription with acetone or other chemical agents results in the word "VOID" appearing.

- **Consecutive Numbering** – Each prescription is uniquely numbered and bar coded to ensure quality.

- **Artificial Watermarks** – Hard-to-copy watermarks afford another means for authenticating the prescription is an original.

- **Warning Band** – Printed message alerts pharmacy staff of security features on the prescription.

Assure Efficient, Proper Dispensing of Prescriptions

Scrip Plus thermal rolls are designed to address the needs of automated pharmacy systems. We take special care in where we place our innovative security features. Unlike other secure prescription providers, a Scrip Plus thermal roll is designed to not obscure or block your dispensing instructions when the pharmacy scans the prescription into their computerized system. This commitment to safety helps to avoid adverse drug events and ensure that the quality of your prescribing effort extends through to the dispensing of your patients' medications.

Enjoy a Significant Cost Savings

For all their sophistication, Scrip Plus thermal rolls are surprisingly affordable. Assuming you issue 2000 prescriptions per month, the Scrip Plus thermal roll will save you an average of $35 over prescriptions generated by a laser or inkjet printer. That's a cost reduction of more than 60 percent.
