

Rhino® Whole House Water Filtration

Model #EQ-300 High Capacity Filtration System

300,000 Gal.
Certified
Capacity

Drink, shower, bathe & live in
clean, healthy water!

With the **Rhino®** Whole House Water Filtration System, you can enjoy bottled water quality throughout your entire home, in your showers, sinks, bathtubs, washing machines, and dishwashers, all for about 25p a day!

The Rhino® Central Filtration System is designed to be virtually maintenance free for 3 full years. No costly service calls or agreements, just replace the main filter unit once every 3 years, cost £350.00, for great tasting healthy water on tap... always!

Effectively filters out chlorine, microscopic sediments, bad taste and odour from municipally treated tap water as it enters your home. This patented multistage filtration process directs the water through 4 stages of filtration for optimum quality and performance. Each Rhino EQ-300 system comes complete with an installation kit, ball valve and pre-filter for easy service and to prevent sediment from entering the system.

This deluxe, high-capacity unit should be installed by a licensed plumber to insure proper installation. Normal installation is 1-2 hours.

List Price £599.95

Common Questions

Q: How long does the EQ-300 Whole House System last?

A: The EQ-300 unit was certified for a 300,000 gallon capacity at 8 gpm, the highest certified capacity of any whole house filtration system! The main filter section should be replaced every 3 years and the sediment pre-filter as needed, every 3-6 months. **(package of 4 costs £21.45)**

Q: What are the benefits of whole house filtration?

A: By filtering all the water that enters your home, you not only greatly enhance the quality of your household water, but you also dramatically improve your indoor air quality. According to the U.S. E.P.A., **“Every home in America has an elevated level of chloroform gas present due to the vaporization of chlorine and other chemicals from tap and shower water.”** Chlorine vapors are a suspected cause and irritant of respiratory problems such as Asthma, bronchitis and allergies. Filtered water will benefit every aspect of your family’s health.

This is the most

valuable and beneficial home appliance you can own!

Q: How does the EQ-300 Whole House System work?

A: There are 4 stages. Please see the diagram below.

Stage 3

Contains a large granule bituminous activated carbon for further reduction of chlorine taste and odor.

Stage 4

Contains a small granule coconut shell based activated carbon for an expanded surface area, which provides the highest reaction kinetics and absorptive capacity for the very best water possible.

Stage 2

A natural media made of zinc and copper where granules are fused together by the process of water atomization. This combination creates an active filtration method, possessing a characteristic known as *redox potential*. This process effectively reduces chlorine taste and odor from tap water.

Stage 1

The sediment pre-filter uses a replaceable cartridge that mechanically filters down to five microns. This important first stage filters the sediment that may be in the water supply so that it doesn't clog the main filter and reduce water flow and/or filter life.

The EQ-300 is UPS shippable and weighs 65 lbs.

This product is warranted to be free from defects in materials and workmanship for one full year!
