## Global Caché Signs 1UControl as New VAR

*1U Control, part of LG Electronics Digital Classroom, to Integrate Global Caché Products with Educational Solutions*

**Jacksonville, OR – March 27, 2007** – Global Caché, the award winning provider of IP-enabling products for homes and businesses, announced today it has signed 1UControl as a Value Added Reseller (VAR) to sell and support Global Caché products as part of their new multimedia control system for K-12 educational environments. The 1UControl solutions are part of LG Electronics' Digital Classroom pilot programs.

Global Caché's flagship product, the GC-100 Network Adapter, is designed to IP-enable devices and appliances that otherwise could not be connected to a network, bringing Ethernet connectivity to infrared (IR) devices, serial (RS232) devices, and relay switches (contact closure), allowing them to be controlled using IP-based software. Global Caché also supplies IR learning devices, IR receivers, and sensors for use over networks.

1UControl's multimedia control system, 1UControl, automates audio/visual equipment for K-12 educational facilities. 1UControl is available in several configurations, from the basic classroom control option to administrative software for automating and maintaining an entire system-wide deployment. 1UControl software, tightly integrated with Global Caché products, is the control piece for the LG Electronics Digital Classroom.

"We're delighted that 1UControl and LG Electronics have chosen the GC-100 as part of their Digital Classroom," said Walt Keller, Global Caché President. "By combining 1UControl software, LG displays, and our connectivity products, an exciting turn-key solution for educators and the IT people maintaining their environment is easily accessible at a cost-effective price point. We are very pleased to be part of this solution."

Kevin Cleary, 1UControl President agrees "Global Caché's Network Adapter is the perfect device for our Digital Classroom. We are focused on the quickly expanding K-12 A/V market. The fact that LG Electronics is plugging the solution into their channel, with training, demonstration kits, and pilots, definitely gives us a big boost out of the gate with our product. In the short while we have been marketing, we have hundreds of classrooms sold, with

several more hundreds expected this year. The solution definitely makes good educational sense. With 1UControl software and Global Caché, we offer strong network management, control and reporting of school district assets.”

#### **About Global Caché, Inc.**

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at [www.globalcache.com](http://www.globalcache.com) or call us at 541-899-4800.

#### **About 1UControl**

The 1UControl system was created for LG Electronics after Kevin Cleary was approached by several schools looking for a classroom control solution. Our 1UControl software supports MPEG1, MPEG4, CATV, Sound/Voice Amplification with an easy to use interface. In using the Global Cache, 1UControl provides network control of any serial, IR or contact closure device. We are delighted with the capabilities, reliability and longevity of the products from Global Cache! For more information on 1UControl and the software, visit online at [www.1UControl.com](http://www.1UControl.com) or call us at 877-UCNTROL (877-826-8765).
