

Turns out Lou Gehrig's Disease is everyone's problem.

ALS is often associated with its most famous victim, Lou Gehrig. But thousands of others are diagnosed with this terrible affliction each year. Tragically, our military veterans, like Jim Thew, suffer an especially high incidence of the disease. The ALS Association works tirelessly to combat ALS through research and advocacy, while helping people get comprehensive treatment and support.

As Lou Gehrig's Disease progresses,
its victims can't turn this page.

Knowing this,
we hope you can't either.

Lou Gehrig's Disease robs its victims of abilities most people take for granted. The ALS Association, with your help, provides comprehensive treatment and support for people living with the disease, and spearheads research and advocacy for the thousands diagnosed each year.

**As Lou Gehrig's Disease progresses,

Once Lou Gehrig's Disease
takes someone's power of speech,
it's gone forever.

But they can still have a voice.
