

# INM eLibrary Corporate Edition

## Create a Searchable, Electronic Corporate Resource Library

The INM eLibrary Corporate Edition is designed to meet the needs of organizations that have large volumes of content to deliver electronically in a light-weight and organized fashion. Based on pre-existing core technology, the INM eLibrary solution allows you to roll out your corporate document library in a fraction of the time of custom solutions, avoiding unforeseen delays, costs, and risks.

Built to leverage powerful back-end technology components, the INM eLibrary solution also features a fully customizable front-end interface that mirrors your company's custom branding. The intuitive user interface is designed to support all levels of users, from the first-timers through to productivity-focused.

The INM eLibrary solution is perfect for:

- Creating a resource library or reference guide
- Creating a library of historical documents
- Building a searchable library of medical, clinical or pharmaceutical information
- Building a multimedia encyclopedia
- Presenting data, music video or image files in a searchable catalog format

### Key Features

The INM eLibrary Corporate Edition features:

- Robust search capabilities that allow users to search by keyword, phrase, type of publication, date and date range, to name a few.
