

ICEFA-III

2008

Third International Conference
on Engineering Failure Analysis
July 13-16, 2008 • Sitges, Spain

First Announcement and Call for Papers

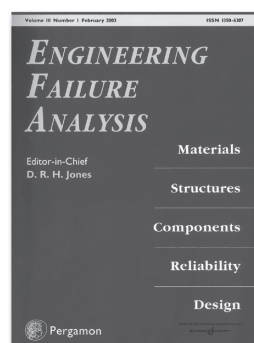

Stay informed about and make your contribution to the latest advances in the design, manufacture and operation of safe and reliable engineering artefacts to benefit the wider world.

In 2008, the conference and exhibition themes will reflect industry progress featuring:

- The analysis of engineering disasters, accidents and failures
- Design, manufacture, operation and maintenance of artefacts to avoid failure
- Examples of technology transfer
- The structure, properties and behaviour of engineering materials involving detailed application of material parameters to problems in structures, components and design.

We now invite you to submit oral and poster presentations for ICEFA-III.

For details please go to www.icefa.elsevier.com (Online submission deadline is **30 November 2007**).

Sponsored by *Engineering Failure Analysis*, an Elsevier publication
