**Serving the  
Semiconductor  
Industry  
Worldwide**

## **Semiconductor Expertise Maximizes Asset Values**

After 17 years of providing quality semiconductor equipment, process development, and product services and support, Equipment Acquisition Resources, Inc. is pleased to now offer best-in-class auction services. EARBid conducts online auctions of semiconductor equipment and related assets. EARBid's semiconductor industry expertise helps bring clients maximum value for their surplus assets.

Convenient bidding draws a large, global audience to EARBid online auctions. Unlike traditional auctions, EARBid eliminates the need for an auctioneer and saves the buyer the time and expense of traveling. Participants can bid 24 x 7 from the convenience of their home or office computer using a state-of-the-art auction system. EARBid's online auctions of quality semiconductor equipment allow bidders to preview assets and bid at their convenience over the course of several days of online sales.

## **Easily Consign Surplus Equipment Today**

EARBid is actively seeking semiconductor and related equipment to place into our monthly online auctions. We offer a reasonable and flexible pricing structure, from a flat rate fee for small consignments to a small percentage of gross sales for larger equipment consignments. We aggressively advertise your product worldwide, providing optimal exposure to your valued equipment, and we have a global audience participating in all EARBid's online auctions.

**Call us today to add your equipment into the next EARBid online auction.**
