

# CREDIT CARD ADVANTAGE

*Speed and Simplify Your Credit Card Processing*

**Credit Card Advantage** delivers a powerful, flexible, and secure internet-based credit card solution that enables you to verify credit card payments over the web in real-time. This e-payment solution seamlessly integrates with Microsoft Dynamics GP, Small Business Financials, CRM, eCommerce, eOrder, and eConnect to provide an open architecture that readily supports multiple payment gateways, processors and diverse business environments.

**Connected Convenience with Efficient Transaction Management:** Credit Card Advantage connects your credit card processing with your accounting solution for fast, efficient management of electronic payments. Numbers are pushed through a secure, seamless pathway and recorded in your general ledger automatically eliminating the potential for human errors and delays associated with disconnected systems.

Credit Card Advantage speeds and simplifies credit card processing from the instant a card is processed to end-of-the-month reconciliation. Faster approval times and automatic data transfer to your accounting solution increase productivity, reduce overhead, and streamline operations. Users can choose whether to charge immediately or pre-authorize and book payments to be charged upon shipment.

**Advanced Detailed Reporting:** Create your own multi-query reports with summaries, detail settlement and daily transaction reports grouped by card type to streamline reconciliation with bank statements. Robust reporting dramatically reduces time spent reconciling credit card transactions and frees your resources for other essential business processes.

**Exceptional Customer Service:** With detailed and complete customer information only a keystroke away, you can drill down and access historical reporting to answer customer questions on demand. Equip customer service representatives with the information necessary to deliver consistent customer service and ensure a high level of customer satisfaction.

**PCI Fault Control Features:** Credit Card Advantage not only offers unmatched operation efficiency for Microsoft Dynamics GP customers, it also supports all Payment Card Industry (PCI) fault control features: Address Verification Services (AVS), and Card Verification Value (CVV2). In addition, it supports Level 2 and 3 Data Credit Card Processing for business, corporate or government GSA purchasing cards to lower your processing fees for Visa and MasterCard transactions.

**Easy Add-ons:** Associated with Credit Card Advantage, Nodus also offers many easy add-ons: AvaTax Option for companies to manage multi-jurisdiction sales and use tax; Credit Card Encryption option for companies who store customers' credit card information in their Great Plains; and quarterly security scanning to meet with PCI Standard Compliance.

## PRODUCT FEATURES:

### Lite Version:

- ✓ **Real-Time Verification:** Verifies credit card payments in real-time
- ✓ **Encryption & Card Number Masking:** All information is encrypted to comply with government requirements
- ✓ **Address Verification:** Allows your company to enforce correct address verification
- ✓ **Freight & Miscellaneous Adjustment:** Automatically adds amount to document total as Freight or Misc charges when authorizing a Book transaction
- ✓ **End of Day Procedure:** Allows you to preview each Setup ID's credit card activity for the day, and print historical settlement reports and daily transaction reports
- ✓ **Expired Cards:** Generates a report which shows if any customers have expired credit cards
- ✓ **Customer Inquiry:** Enables you to view the processed transaction waiting to settle, and settled transactions

### Professional Version:
