## Securely Capture Customer Information & Signatures to Store Electronically

### SIGNATURE CAPTURE & STORAGE SYSTEM

Hypercom L4100\*

Interlink Electronics ePAD\*

**Use Your TSD Software, a Signature Pad & eSigner from Orion Systems to Go Paperless**

■ **Reliable, Legal Signature Capture**

Patented technology allows for the creation of auditable, enforceable electronic documents that comply with all document regulations and laws.

■ **Security without the Paper Trail**

Eliminate the need to print and store contracts locally. Signed contracts are archived at a secure, state-of-the-art data center.

**Easy to Use**

The plug and play hardware is easily integrated into your IT and business processes. The web-based software makes management of services and upgrades occur seamlessly, without interruption to your business.

<b>Features</b>	<b>Benefits</b>
Interfaces to TSD RENTAL Management Products	This integrated solution allows you to access the contract already stored in your TSD software and quickly have an electronic signature added to the agreement.
Captures and Stores Signatures Electronically	No need to store paper rental agreements or even print them. Signed contracts can be emailed to customers. The document, including the signature, is unalterable according to federal regulations, making the document tamper-proof and legally binding.
Open and Close Rental Agreements Faster	Improve customer service by eliminating paperwork. Depending on the model of signature pad, customer information such as driver's license number and/or credit card number can be captured with a swipe of the card.

\*Signature pad hardware and pricing are subject to change.
