# Confio Software Achieves Record Quarter with Demand for Confio Igniter Suite

### New Products Ignite for SQL Server and Ignite for DB2 Drive Growth in Q2 for Confio Software

**July 19, 2007 – Boulder, CO** - Confio Software, the leader in <u>Wait-Time application performance management</u> tools, today announced that bookings growth for the first half of 2007 increased by 75% over the same period a year ago, with the company achieving record bookings again in Q2 2007.  Achievements in Q2 included the release of the new Ignite™ for DB2, extending Confio's <u>Wait-Time database performance methodology</u> to cover approximately 85% of the database market, including multiple Oracle, Microsoft and IBM databases.

"The demand for the Confio Igniter Suite continues to grow strong by new customers, as well as existing sites, driving our revenues to a record quarter," said Charlie Sander, CEO of Confio.  "The introduction of Ignite for DB2 this quarter demonstrates how our team continues to work hard to deliver our best-in-class solution for cross platform database management.  Our suite of tools now covers the majority of the database market and we plan to continue to add tools to further expand our line-up of supported databases."

Confio Software is committed to empowering companies to achieve the highest level of business advantage from their databases. The Confio Igniter Suite can be used across a mix of Oracle, SQL Server, and DB2 databases and Java/J2EE applications to speed the process of finding and resolving performance issues.  For DBAs, Ignite identifies the exact business processes and application code that affect <u>database performance</u> and the responsible source.  Ignite also shows exactly where the problem resides and who should own the problem to ensure the best path to resolution.

A few notable customers licensing Ignite in Q2 2007 include American Express, Chevron, and Medtronic.

Confio Ignite delivers rapid results for database performance management.  Customers are able to download, install and begin identifying problems within 30 minutes.  DBAs who are interested in learning more about industry best-practice <u>Wait-Time analysis</u> and <u>database performance tools</u> can visit www.confio.com.  Free trials of Confio Software's leading multiplatform application performance monitoring tool are available for download at <u>http://www.confio.com/freetrial</u>.

### About Confio Software
Confio Software develops performance monitoring and tuning tools for databases and the applications that depend on them.  Supporting DB2, Oracle and SQL Server database, as well as tight coupling with Java/J2EE applications, Confio is the leading monitoring solution built on best-practice Wait-Time methods.  The Confio Igniter Suite improves service levels and reduces costs for database and application infrastructure.   Confio is based in Boulder, Colorado, with customers worldwide.
