Laser Engraved Name Tags

"Companies spend thousands to millions of dollars a year for advertising to attract customers; however, what happens once the customers arrive--are they maximizing their efforts to create a comfortable, trusting relationship? A name tag helps to foster that connection between you and your customer, it lets them know that you are here to help and your objective is to service their needs."

--Clyde Collier, CEO and founder of Name Tag, Inc.

The new laser system functions like an ink jet printer, scanning across the sheet of plastic. The machine laser engraves at a rate of 1000 pulses per inch, approximately 1000 dpi, for an elegant and precision engraved name tag.

Create a lasting first impression with a quality laser engraved name tag from Name Tag, Inc. Laser engraved badges use a 1/16 inch thick engravable two ply plastic -- as the top layer is etched away, the bottom layer is revealed; creating a two colored tag. Logos may be added using a hot-stamping process, and single color logos may also be engraved directly onto your tags. Order quick and easy online and create your own truly unique laser engraved name tags.

Laser engraving benefits:

- Fully customizable with your engraved or hot-stamped logo with up to 6 colors.
- High quality engraving capabilities to produce the finest engraved name tags.
- 24 Material colors available (14 matte colors/6 metallic colors, and four wood grains). Other materials such as coated metals, wood, and acrylic may be special ordered for some jobs.
- True type fonts, such as those found in word editing programs may be engraved on your tags. (Rotary engraving requires that special engraving fonts be used)
