ULTRA DOOR JAMB ARMOR

The most effective way to repair and help prevent kick-in damage. With knock-out holes to accommodate almost any lock spacing (or multiple deadbolts), this set will work on just about any door with a wooden doorjamb.

Install full set in less than an hour!

Hinge Shield

Fits around the hinges and helps prevent hinges from being kicked in (2 included with each set).

Ultra Door Shield

A lower-profile version of the door shield. Helps prevent the door from splitting when kicked. These are an integral part of the Door Jamb Armor system. Ultra Combo Set comes with Ultra 2 Door Shields.

FIX IT ONCE...
SECURE IT FOREVER

48" Long

BURGLARS...
JEALOUS SPOUSES...
TENANTS...

Regardless of who does it, someone must fix it. Repairing kick-in damage any other way will cost more, take longer, and will likely result in repeat offenses.

Ultra Jamb Shield

A 48" long sleeve that slides over the doorjamb. The Ultra Jamb Shield was designed for doors with multiple deadbolts (or privacy locks) and for those who are unsure of their lock spacing. Knock-out holes to fit lock spacing from 4" to 31".

Jamb and Hinge Shields secure to stud with 3 1/2" screws (included)

Packaging: All pieces are powder coated, so they can be painted to match the color of your door or jamb.
Ultra Combo Set: Includes 1 Jamb Shield, 2 Hinge Shields and 2 Door Shields. Purchasing a combo set will allow the system to work the way in which it was intended.
Base Ultra DJA Set: Includes 1 Jamb Shield, 2 Hinge Shields.
Ultra Door Shield Set: Includes 2 Ultra Door Shields.

Suggested Retail Pricing:

Item Number	Item Description	Door Shield Color	Jamb & Hinge shield Color	Jamb Thickness	Lock Spacing	Door Thickness	Lock Backset	Suggested Retail Price
SET-ULT-10002	Ultra Combo Set - 2-3/8" Backset	White	White	3/4"	4" to 31"	1-3/4"	2-3/8"	\$149.95
SET-ULT-20002	Ultra Combo Set - 2-3/4" Backset	White	White	3/4"	4" to 31"	1-3/4"	2-3/4"	\$149.95

Door Jamb Armor Installation*

Installing the full Door Jamb Armor set should take less than an hour, for any person with reasonable handy skills. Professional carpentry skills are not necessary.

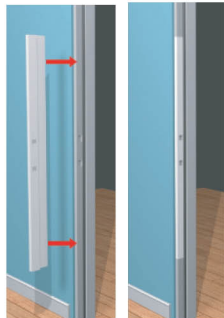

Installing Door Jamb Armor does not require removal of the door or replacement of the jamb. No routing, chiselling or cutting of the jamb is necessary.

The door in the illustrations has been removed for illustration purposes only

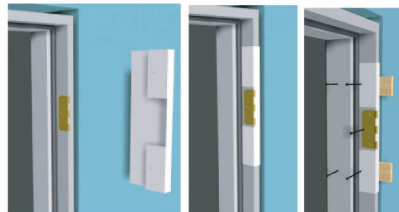

1. Remove interior trim. This should take less than 5 minutes on most homes. Do not remove the door!

2. Use a reciprocating saw to cut nails where pieces will be installed.

4. Use a reciprocating saw to cut nails where Hinge Shields will be installed.

6. Replace trim. Rest secure.

3. Slide Jamb Shield over jamb. Pre-drill holes into stud and secure piece with screws (included).

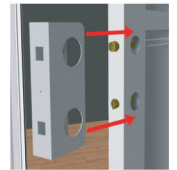

5. Slide Hinge Shield around hinge. Pre-drill and secure.

Installation is the same on a damaged or new jamb. Slide it in, secure it and forget it

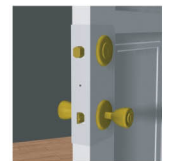

DOOR SHIELD INSTALLATION

1. Remove locks

2. Slide Door Shield onto door

3. Replace locks

* Detailed instructions are included with every Door Jamb Armor kit.

Testimonials

"This is a great product... It Can be used in situations where no other product will work. Had I known about this sooner, we would have used it on every episode. I'm sold"

-Frank S., Security consultant for "It Takes a Thief"-

"A lot of products say they do one thing or another. This actually works... It's inexpensive, easy to use and gives you real protection... Please tell me why someone would not want to use this product."

- Michael King, host of the "HomeTalk USA" Radio Show -

"Hey, I just want to let you guys know that the installation went just as easy as you described and finished in less than a hour. I travel a lot and the piece of mind that I have that my wife and possessions are safer put my mind at ease. I am 6'4" 240lbs and I put a couple of whacks in the door that would have taken the old jam out for sure. Nothing I did could budge it. Thanks a bunch"

- Doug M from Illinois, another satisfied customer -
