# DOOR JAMB ARMOR

**The most effective way to repair and help prevent kick-in damage**

**Install full  
set in less  
than an  
hour!**

## Standard / Low Profile

Designed for doors with standard (5-1/2" on-center) lock spacing. Best for reinforcing or repairing newer doors. Low profile version comes in oil-rubbed bronze and satin nickel finishes.

**SET-STD-X055 : SET-SLP-XX55**

## Universal

Designed for doors with non-standard (5" to 12" on-center) lock spacing. Most often used for repairing and reinforcing older doors.

**SET-UNI-X000**

## Ultra

**New to the Door Jamb Armor Line!**  
 Features knock-out holes to fit almost any lock spacing (or multiple deadbolts). Works on just about any door with a wooden doorjamb.

**SET-ULT-X0002**

**Packaging:** All pieces are made of steel and are powder coated, so they can be painted to match the color of your door or jamb.

**Combo Set (pictured):** 1 Jamb Shield, 2 Hinge Shields and 1 or 2 Door Shields. Purchasing a combo set will allow the system to work the way in which it was intended.

**Base DJA Set:** 1 Jamb Shield, 2 Hinge Shields.

Item Number	Item Description	Door Shield Color	Jamb & Hinge shield Color	Jamb Thickness	Lock Spacing	Door Thickness	Lock Backset	Suggested Retail Price

www.djarmor.com

**Patent Pending**

Without jamb and hinge protection, these pieces serve little purpose. Once other components are installed, these pieces are essential because they help prevent the door from splitting when kicked. All combo sets come with door shields.

**Door Shield Set:** Ultra and Universal come as sets of 2. Standard and Low Profile include 1 Door Shield.

Item Number	Item Description	Door Shield Color	Lock Spacing	Door Thickness	Lock Backset	Suggested Retail Price

**As Seen On**

## Door Jamb Armor Installation\*

**Installing the full Door Jamb Armor set should take less than an hour, for any person with reasonable handy skills. Professional carpentry skills are not necessary.**

**Installing Door Jamb Armor does not require removal of the door or replacement of the jamb. No routing, chiselling or cutting of the jamb is necessary.**

**The door in the illustrations has been removed for illustration purposes only**

1. Remove interior trim. This should take less than 5 minutes on most homes. Do not remove the door!

2. Use a reciprocating saw to cut nails where pieces will be installed.

3. Slide Jamb Shield over jamb. Pre-drill holes into stud and secure piece with screws (included).

4. Use a reciprocating saw to cut nails where Hinge Shields will be installed.

5. Slide Hinge Shield around hinge. Pre-drill and secure.

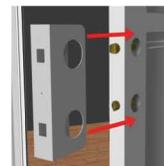

6. Replace trim. Rest secure.

## DOOR SHIELD INSTALLATION

1. Remove locks

2. Slide Door Shield onto door

3. Replace locks

**Warranty:** All Door Jamb Armor products come with a one-year guarantee. If your home is burglarized as a direct result of our product failing, we will pay your homeowner's insurance deductible (up to \$200). We stand by our products as they will stand by you for years to come.

**Installation is the same on a damaged or new jamb. Slide it in, secure it and forget it**

\* Detailed instructions are included with every Door Jamb Armor kit.
