

Off the Grid? No Problem.

Blue. It's the new Green.

Steer your off-grid development away from inefficient, carbon-heavy electricity toward more sustainable development fueled by gas. Half the cost of electricity, clean burning and preferred by homeowners around the globe, LP gas is the obvious choice. HBH Gas Systems and Ferrellgas have come together to provide the capital, engineering, construction, operations and tenured gas service for developments of all sizes - any time, any place.

HBH Gas Systems, the nationwide leader in community gas systems, will add value and the enhanced marketability of dual-fuels to your development with reliable and affordable underground gas service. Contact HBH Gas Systems today to learn how a Central Gas Distribution System can provide your off-grid development with the individually-metered gas service your customers deserve. Call 512 - 306 - 0073 or visit www.hbhsystems.com.
