Resco Explorer 2007

Bratislava, Slovakia — September 24, 2007 — Resco, one of the leading software developers, announced today the availability of the new version of the best selling file explorer on the mobile market — Resco Explorer 2007.

Resco Explorer 2007 for smartphone and pocketpc platforms keens on aspects that made it so popular amongst users while adding many new features that will certainly be appreciated. One of the most highlighted new functions is the FTP client for smartphone version and support of decompressing RAR archives in both versions.

Besides the FTP client and support of RAR archives, new features in Resco Explorer 2007 for smartphone and pocketpc platform contain but are not limited to the:

- Full support of wm6.0
- File decryption in memory
- Customizable keyboard shortcuts
- Speed measuring for copying/moving/beaming
- Multi-language version (En/De/Es/Fr)
- Advanced multi-select mode
- Customizable startup folder

"Resco Explorer wins our Pocket PC Best Software Awards File Manager category year after year after year, and with each upgrade it just gets better. I expect no less from the Smartphone version."

"I have been using Resco Explorer for a long time and am always excited when the guys at Resco release an updated version. They continue to add many new features to the program and the software remains fast and very intuitive. I strongly recommend Resco Explorer to be the first thing users install on their device."
