Macro Scheduler

Advanced, Easy to Use, Windows Software Automation Tool.

"This has to be by far the best software I have ever purchased in my life. I recouped my investment within the first 10 minutes of using the software. I'm on day 3 now and every few hours I create another free employee to work for me. Thanks MJT!" Bill Karas, Miami Software Development

Automate intricate software processes and save wasted time and money.

Macro Scheduler is the computer automation tool that has been chosen by home users, small businesses, and Fortune 500 companies alike. Macro Scheduler's intuitive MacroScript language was designed specifically for automating Windows applications. By operating at the user level it is application-independent and allows automation of repetitive, time consuming tasks.

"Microsoft came in and said there was no way to automate a particular problem. I downloaded Macro Scheduler and had a working fix in one day!" Ian Smith, UK

Eliminate Repetitive Data Entry
