

# Cyfin Reporter

## Manage employee Web use effectively.

Trusted worldwide, Cyfin Reporter is an effective Web-use reporting software solution for any organization. It is an advanced logfile analyzer for your proxy server, firewall or caching appliance. Comprehensive and easy to use, it works hand in hand with almost all popular appliances to analyze logfiles and generate clear user activity reports automatically. With Cyfin, you will be able to audit Internet usage at-a-glance with reports customized to support your organization's acceptable use policy (AUP).

Top Users' Abuse Report

## Key Features

- Monitors Internet access in 81 categories
- Categories can be rated for acceptability based on your Web-use policy
- Monitors Web use by individual users, specific work groups, or entire organization
- Automatically detects and identifies Web abuse
- Produces categorized manager-ready reports
- Tracks bandwidth usage by Web content category

## Reporting Features

- Interactive reports offer quick drill-down capabilities
- Reports are configurable to show only the data you actually need
- Report Scheduler runs and distributes reports automatically
- Distinguishes real user activity from erroneous hits
- Web-use reports are detailed, accurate and actionable

## Administrative Features

- Browser interface allows for remote administration
- Logfile Manager updates and displays logfile status
- Data Manager compresses logfile data for faster reporting
- Data Manager lets you export Web-use data to other applications
- Operator accounts allow other personnel to run reports

## Technical Advantages

- Supports 95 different logfile formats, e.g., ISA Server, BlueCoat, Squid Proxy, Border Manager, Cisco, NetCache, Smartfilter, Symantec, Watchguard and more
- Easy to install, integrate, set up and configure
- Does not interact or interfere with real-time traffic
- Faster than competitive products
- Supports multiple logfile locations
- Free Technical support, software upgrades and daily URL list updates

## Compatibility

Operating Systems: Windows 2003/XP/2000/NT, Solaris, Red Hat Linux

Browsers: Microsoft Internet Explorer 6.0 or higher, Netscape 7.0 or higher, and Mozilla Firefox.

## Pricing

Wavecrest's Cyfin solutions offer the industry's best value for Internet monitoring and reporting. Cyfin Reporter is a licensed, subscription-based software product. Pricing is tiered, based on the number of people ("non-concurrent users") to be monitored. In general, the price-per-user decreases as the number of users goes up.

Every Cyfin Reporter purchase includes:

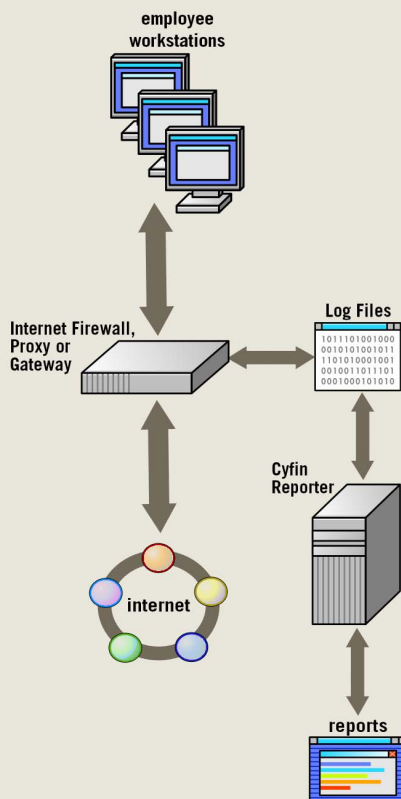

- Free technical support
- Daily URL list updates
- Free product upgrades

Discount pricing is available for government agencies, educational institutions, non-profit organizations, and resellers. For more information, contact sales at 321-953-5351, ext. 3.

## Wavecrest Computing

Wavecrest Computing has provided business and government clients with reliable, accurate Web use management software since 1996. IT specialists, HR professionals and business managers trust Wavecrest's Cyfin® and CyBlock® products to manage employee Internet usage — reducing liability risks, improving productivity, saving bandwidth and controlling costs.

Wavecrest has over 3,000 clients worldwide, including the US Department of Justice, Procter & Gamble, General Electric, Hewlett Packard, Bayer, British Telecom, Edward Jones, Blue Cross/Blue Shield, the US Army and a growing list of global enterprises and government agencies. Wavecrest Computing is a GSA Schedule Contractor. For more information on our company, products and partners, visit [www.wavecrest.net](http://www.wavecrest.net).
