

# Cyfin Reporter

## Manage employee Web use effectively.

Trusted worldwide, Cyfin Reporter is an effective Web-use reporting software solution for any organization. It is an advanced logfile analyzer for your proxy server, firewall or caching appliance. Comprehensive and easy to use, it works hand in hand with almost all popular appliances to analyze logfiles and generate clear user activity reports automatically. With Cyfin, you will be able to audit Internet usage at-a-glance with reports customized to support your organization's acceptable use policy (AUP).

### Key Features

- Monitors Internet access in 81 categories
- Categories can be rated for acceptability based on your Web-use policy
- Monitors Web use by individual users, specific work groups, or entire organization
- Automatically detects and identifies Web abuse
- Produces categorized manager-ready reports
- Tracks bandwidth usage by Web content category

### Reporting Features

- Interactive reports offer quick drill-down capabilities
- Reports are configurable to show only the data you actually need
- Report Scheduler runs and distributes reports automatically
- Distinguishes real user activity from erroneous hits
- Web-use reports are detailed, accurate and actionable

### Administrative Features

- Browser interface allows for remote administration
- Logfile Manager updates and displays logfile status
- Data Manager compresses logfile data for faster reporting
- Data Manager lets you export Web-use data to other applications
- Operator accounts allow other personnel to run reports

Visits By Classification

Classification Name	Download Time	Visits	%	0	26,469	52,939
