Passware Encryption Analyzer Professional v.1.0
New encryption scanning tool by the leader in password recovery

Passware Inc., a technological leader in password recovery, applies its 9-year experience in cryptanalysis to introduce a new solution in encryption detection to forensic agencies, law enforcement organizations, and IT professionals.

Passware Encryption Analyzer Professional scans computers and finds all the password-protected or encrypted files on a PC or over the network.

Employees often leave a company without giving a complete list of their passwords or protected files. Encryption Analyzer Professional solves this problem in a time-efficient way — a full system scan usually takes under an hour, and IT administrators get full reports on protected files. Encryption Analyzer Professional can scan systems over the network, performs scheduled scans and supports batch mode.

Encryption Analyzer Professional is integrated with Passware Kit, a universal password recovery software pack. This provides immediate password recovery for any and all protected files detected. Encryption Analyzer Professional is user-friendly and supports more than 100 file formats, scanning over 4,000 files per minute on an average PC.

Features	Benefits
Scan speed over 4,000 files per minute	Full system scan takes under an hour
Over 100 file formats supported, including the latest releases	No encrypted file is skipped
Scans network drives	Scan remote computers over the network
Displays password recovery options and decryption complexity	See all decryption options available for your files
Works with Passware Password Recovery Kit	Appropriate password recovery module is launched automatically
Saves files lists and reports	Get reports for a case
Portable version	Run Encryption Analyzer Professional from USB flash drive with no need to install
User-friendly Explorer-like interface	Easy to use
Command-line version	Use this software in batch mode, run scheduled scans
Displays MD5 hash values	Get evidence that a files contents remains unchanged
Runs under non-Administrator accounts	No need for administrative privileges
Available as SDK for .NET	Use all the features of Encryption Analyzer Professional in your applications

System Requirements
- Intel Pentium III or higher compatible CPU
- 64 MB RAM
- MS Windows 98/ME/2000/NT/XP/2003/Vista
