

ParetoLogic Spam Controls

Powerful, effective filtering of unwanted and fraudulent e-mails!

ParetoLogic Spam Controls has one of the highest spam detections in the industry with fewer false positives.

Features/Benefits to ensure safety:

- **Detects and quarantines spam** from Outlook and Outlook Express in any format including text, html, and images.
- **One of the highest detection rates** in the industry!
- **Delete all quarantined spam emails** simply and easily using the "purge" feature.
- **Fewer False Positives!** ParetoLogic Spam Controls uses advanced spam pattern classification to identify confirmed spam, eliminating cases of false positives in which wanted email messages are falsely labeled as spam.
- **Customer Care and Support** that is second to none as we consider it a privilege to be of service to you!

Easy to set-up and use, ParetoLogic Spam Controls does it all for you. No complicated rules to set-up and manage!

Modern email threats demand the advanced power of ParetoLogic!

Guarding against annoying spam and dangerous phishing attacks, ParetoLogic Spam Controls is your premium defense against unwanted email intrusion. Utilizing modern technology and detection methods, ParetoLogic Spam Controls has one of the highest spam detections in the industry. Unlike traditional and outdated spam filters, ParetoLogic Spam Controls is equipped to detect even the most sophisticated and evasive threats, including those composed in text, html, and graphics.

"Finally a spam filter that actually filters spam correctly. I was receiving hundreds of spam emails a day and had tried other programs that didn't seem to catch all the spam or falsely identified it as spam. ParetoLogic Spam Controls was so easy to set-up and use that anyone could use it and see the results I have. I highly recommend this product and wanted to say thank you for giving me back my inbox!"
