

NETCLARITY
PREEMPTIVE, PROACTIVE PROTECTION

EasyNAC™ Appliances

DATASHEET

“NetClarity, one of the Who’s Who of NAC, gives Microsoft and Cisco a run for their money...”

- CRN

“NetClarity picks up where firewall, anti-virus, intrusion detection and intrusion prevention leave off“

- John Gallant,
President,
NetworkWorld

“One of the three most innovative Network Security companies in the World”

- RSA

Product Excellence in
Intrusion Prevention 2007

- ISPG

Plug it in. Turn it on. Configure it in 5 minutes.
EasyNAC™ is up and running. It couldn’t be easier.

Introducing the simplest, most cost-effective Network Admission Control (NAC) solution on the market.

Deploy Pre-and-Post-NAC without any Agent software and without the need for new hardware (802.1x compatible switches, IDS, IPS, etc.).

EasyNAC™ uses the NetClarity patent published model for clientless NAC so you don’t have to worry about malicious insiders, rogue wireless and others gaining access to your precious network resources.

Have you already purchased a Cisco NAC, Microsoft NAP or Juniper UAC solution? EasyNAC™ fills in the gaps in these solutions at a fraction of the cost, making your network cleaner and safer, in real-time.

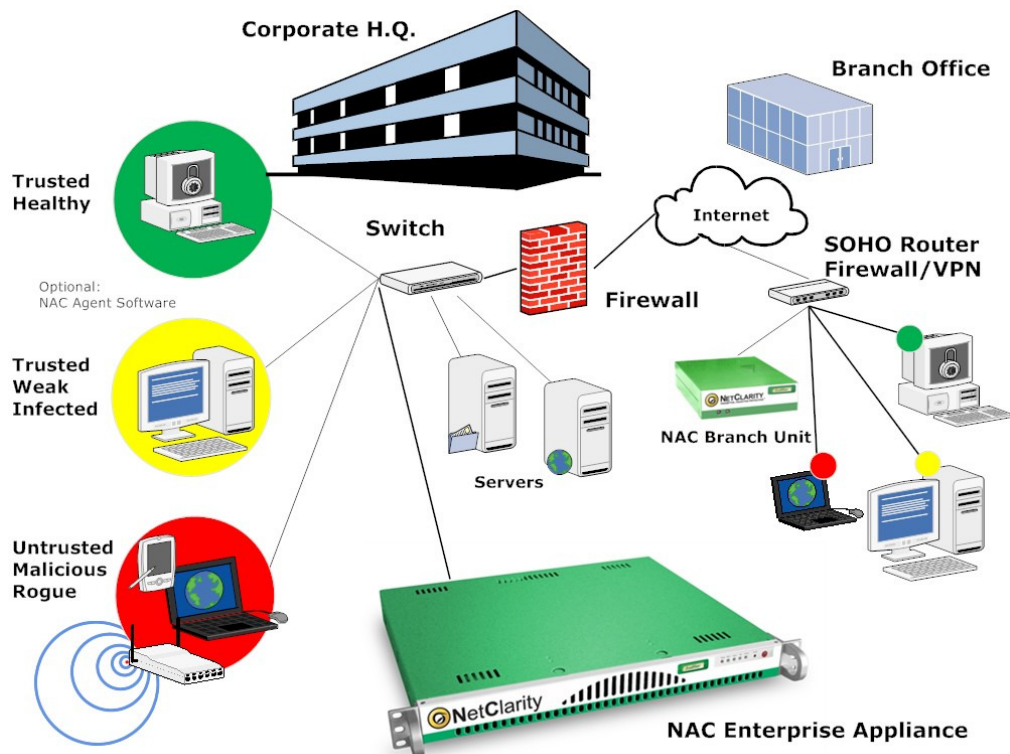

Finally, an EasyNAC™. Try it and see for yourself. Thirty day evaluations available.

Deploy our Endpoint Defender™ agent on all Windows® laptops, desktops and servers, *included at no additional charge*, to gain more Post-NAC control of your environment.

Includes background host-based weaknesses (known as CVE@s) plus malware scanning at very low CPU consumption.

In addition, use the policy engine to control allowed processes and applications. Plus you can block data leakage at USB, CD/DVD/Floppy drives.

That means cleaner, healthier systems with less risk of host-based vulnerabilities and zero-day exploits.

SERVICE OPTIONS*

Software Updates, CVE® and Malware Subscription Service, Hardware Maintenance and Support pre-paid annually. Multi-year agreements are available.

Standard Support includes email and telephone support Monday through Friday, 8 a.m. to 5 p.m. Eastern, 5-7 business day replacement service plus all product maintenance updates.

Premium Support includes 24 x 7 x 365 email and telephone support, next-day replacement service (where available) plus all product maintenance updates.

On-site installation, high availability backup units, extended hardware coverage and professional services are available through Certified Channel Partners only.

*Additional charges may be required.

Features and Benefits

Simplified Network Admission Control (NAC)

- Deploys in minutes without the need for client software
- Works with existing network and legacy infrastructure – no need for expensive upgrades

Endpoint Control and Compliance

- Granular control of high-risk endpoints
- Detect missing patches, high risk vulnerabilities, ports and applications
- Document end-user policies for regulatory compliance initiatives
- Harden endpoints to reduce the risk of data leakage and successful zero-day attacks

Network Asset Detect, Alert and Block

- Know who and what is on your network and accessing resources
- Alert and block against suspicious users, malicious insiders and rogue wireless devices

Turnkey Appliance Model

- Plug it in, turn it on and configure it quickly and easily
- No need to worry about security, hardware, operating system, updates, etc.
- Easier to deploy, simplified user interface so you can use the system within minutes not hours, days, weeks or months

Specifications

Enterprise Units (1-u Rack mount)

Part Number	Network Size
NC-EASY-NAC-2000	up to 2048 IPs
NC-EASY-NAC-1000	up to 1024 IPs
NC-EASY-NAC-500	up to 512 IPs
NC-EASY-NAC-250	up to 256 IPs

- 3.2 GHz Pentium 4 processor (or higher)
- 80 GB of built-in high-speed HD storage (or higher)
- 1 U rack-mountable chassis
- 2 GB of high-speed memory (or more)
- Built-in keyboard, video, mouse and serial ports for initial setup
- Internal 10/100/1000 Ethernet controller (NIC)
- Dimensions: 1.75"H x 17.0"W x 14"D

Branch Units (portable, hand-held)

Part Number	Network Size
NC-EASY-NAC-200	up to 256 IPs
NC-EASY-NAC-100	up to 128 IPs

- 1.5 GHz VIA C7 Eden processor (or higher)
- 80 GB of built-in high-speed HD storage (or higher)
- 1 GB of high-speed memory
- Built-in keyboard, video, mouse and serial ports for initial setup
- One internal 10/100 Ethernet controller (NIC)
- Dimensions: 2.0" x 7.0" x 9.5"
- Size of a paperback book
