

KTvid

Real-time, two-way
videoconferencing for mobile phones

PREVIEW
RELEASE

High-quality video over low bandwidth
Works on today's 2.5G networks
Software-based, small memory footprint

KTvid delivers **exceptional image quality**, even over 2.5G cellular networks

- ▶ KTvid brings advanced imaging technology to cellphones
- ▶ Uses proprietary image compression & smoothing technology
- ▶ Even at low frame rates (8 FPS), the KTvid codec delivers image quality that looks as good as 15 FPS from other codecs currently on the market

KTvid is ready for today's **applications**, on today's **handsets**, over today's **networks**

- ▶ KTvid is carrier-independent and network-independent. Works cross-carrier.
- ▶ Runs on any WM5/6 Professional handset
- ▶ Software-based. No special hardware needed
- ▶ Addresses **consumer** trends (e.g. user-generated content, live 'citizen journalism,' social networks); and **business** needs (e.g. visual tech support)
