

# **TransNexus® Maximizes Your VoIP Profits**

The TransNexus Operations and Billing Support System (OSS/BSS) software platform provides all the tools a service provider needs to convert their Session Border Controller (SBC) into a full featured service delivery platform. The TransNexus OSS/BSS software enables service providers to immediately begin profiting from new VoIP services such as:

- Wholesale VoIP Peering and Interconnect
- SIP Trunking Services
- Wholesale DID (Direct Inward Dial) SIP Services

The drawing below illustrates how the TransNexus solution complements an SBC. When an SBC receives an inbound call leg, the SBC sends a route query to the TransNexus platform for optimum routing instructions based on cost, quality, access control and other business policies. The SBC then completes the call to the destination returned by the TransNexus platform. When the call is completed, the SBC sends a Call Detail Record (CDR) to the TransNexus platform for traffic analysis, rating and billing.

## Features:

- Least Cost Routing for Inter-state, Intra-state and extended local calling areas.
- High performance routing for up to 2,000,000 routing destinations.
- Extensive Number Translation features.
- Time of Day and Day of Week routing.
- Detailed Traffic Analysis Reports
- Quality of Service Alarms and Routing Controls
- Prepaid Billing and automated credit controls
- Hourly reports showing profit by customer and by route
- Billing for wholesale services
- Reconciliation Reports for auditing bills received from VoIP termination carriers

## Terms:

- One time software license fee – which may be financed in 12 monthly payments.
- Price ranges from \$5,000 for a network with 1 million minutes per month to \$267,000 for a network with 200 million minutes per month.
- Free 90 day Evaluation Trial, complete with full technical support and remote training.

## About TransNexus

TransNexus, founded in 1997, has been providing carriers with OSS/BSS solutions for wholesale VoIP peering and interconnect since 2000. Contact: [Info@TransNexus.com](mailto:Info@TransNexus.com) or visit [www.TransNexus.com](http://www.TransNexus.com).
