**SCRIBE ANNOUNCES ADAPTER FOR MICROSOFT DYNAMICS NAV**

*New product further expands integration and migration capabilities for the Microsoft Dynamics channel*

**BEDFORD, NH – October 25, 2007** – Scribe Software, a provider of configurable data integration and migration software technology for leading enterprise business applications announced the planned release of its Scribe Adapter for Dynamics NAV. This product extends the capabilities of Scribe Insight to Dynamics NAV, providing partners and customers with powerful and flexible data integration and migration without having to write a single line of code.

More than 3500 Microsoft Dynamics customers use Scribe Insight for integrating their mission critical applications with a variety of systems, thereby providing employees access to essential customer data, during critical business events, enabling them to service customers better and ultimately sell more. "We have been leveraging the open and flexible Scribe Insight tool to provide our Microsoft Dynamics CRM and Dynamics GP customers with superior integration solutions for years", states John McKeague, Tectura GP and CRM practice lead, a Scribe Elite Reseller. "Having the Scribe Insight capability with Dynamics NAV opens up an entire new set of opportunities for a new set of our customers."

Built upon Scribe Insight, the industry leading integration tool, and .NET technology, the solution easily reads data from and writes data to Microsoft Dynamics NAV allowing customers to:

- Process orders in real-time from an external eCommerce site
- Extend order processing functionality to their sales teams via their CRM system
- Automatically process POs from an employee facing purchase requisition portal
- Update inventory immediately from an MRP or inventory management application
- Integrate virtually any legacy or specialized vertical application with GL, AR, AP, etc.

“Our global reseller channel of over 600 partners is eagerly anticipating the availability of a Dynamics NAV integration solution that is as comprehensive as our support for the other Microsoft Dynamics applications,” states Lou Antonucci, Director of Sales for Scribe. “Scribe Insight has become a critical element of their success in these other markets and they are looking to extend this to their Dynamics NAV practices.”

The release of the Scribe Adapter for Dynamics NAV is planned for December 2007 to support its pending release of an integration solution that connects Dynamics CRM to Dynamics NAV. The Scribe Adapter for Dynamics NAV will be priced consistent with Scribe’s Adapters for other Dynamics products.
