### **San Diego Open Web Application Security Project (OWASP) Launches**

*San Diego, CA – ComSec, Inc. announces the establishment of the San Diego OWASP Chapter. As organizations continue to web-enable applications and provide enhanced services to customers via the web vulnerabilities continue to propagate. OWASP provides principals, techniques, and remedies for web application vulnerabilities.*

OWASP (OWASP.ORG) is a free and open community devoted to the advancement of application security awareness and improvement. With a plethora of funded open-source products, coding principals that have been adopted by PCI standards, and the intellect of an exceptional list of security experts OWASP continues to grow and deliver exceptional resources for security conscious individuals.

"I am honored and excited to be the San Diego OWASP President. Application security continues to be a weak-link in many organization's security postures. I will work to enable organizations to improve their application security through education, awareness, and collaboration with OWASP & the local community," said Jeromie Jackson- CEO of ComSec. The first chapter meeting will be held in San Diego on November 28th- all are welcome. As the event may be catered please RSVP to [sales@comsecinc.com](mailto:sales@comsecinc.com) to ensure everyone is accounted for. If you have exposed any web-based applications on the Internet come learn how to ensure it is a business enabler as opposed to a significant liability.
