## A Lending hand

### ***Eljay Remote Management Systems***

Eljay, an integrated network technology company offers holistic remote network management solutions that are designed and developed, keeping in mind the high demands of today's business. Benchmarked to international standards, the solutions are reliable, scaleable, and assure efficient working of your network. Not to mention your employees.

## Close up

### ***Remote Network Management***

Network management is critical to efficient business functionality. Be it telephone system, e-mail or e-commerce, having a dependable communications network with maximum uptime and availability is of paramount importance. A recent study by Infonetics revealed that overall downtime costs cut about 2% to 16% of annual revenue. When your network goes down, it actually takes your productivity and revenue along with it. This affects your company's reputation. And ultimately tamps with the trust of your customers. But fear not, with Eljay by your side you can maintain a robust reliable network that enables you to excel excellence.
