## MXSWEEP - RECOVERY AND CONTINUITY

### RECOVERY AND CONTINUITY

---

Over the last five years email has evolved into the most popular form of communication within the business world. No longer a mere substitute for the postal/telephone services, it now provides a valuable and efficient link between all stakeholders and is increasingly vital for facilitating fast and effective business communications.

Traditionally during periods of server downtime, access to and restoration of the email service was low on the agenda, but as email becomes more essential to business and as demands upon it increase the restoration priority within the Disaster Recovery Plan becomes critical. In many businesses, this requirement is now equally or sometimes more immediate than ERP or CRM systems restoration. With MXSweep's Recovery and Continuity access to email is "always on" and recovery of email is instantaneous.

### MXSWEEP DELIVERS ON

---

**Recovery** – Using our secure Web Portal users can access their encrypted email archive to re-deliver any email, with an option for the IT resource to re-deliver all emails to the previous backup for up to 7 days

## MXSWEEP - RECOVERY AND CONTINUITY

### EMAIL WEB PORTAL

Users or administrators can logon to the secure MXSweep web portal and access all recent emails from a simple 'Web email client'.

The Web email client allows users to send (with attachments), receive and retrieve emails from the encrypted MXSweep archive.

### INSTANT REPLAY

MXSweep's award winning 'Instant Replay' provides a fast recovery service for email. From an encrypted archive of the latest emails, users can logon to the secure MXSweep portal and re-deliver single or multiple emails which is invaluable when an email has been inadvertently deleted.

In addition, have you ever been in a situation where your email server has failed several hours after the last backup? If so, you will appreciate how costly in both time and money lost emails can prove. Consider for a moment the impact on your business the loss of a days worth of email would have!

With Instant Replay, you can re-deliver any emails up to 7 days prior to your previous backup, and right up to the point of back up failure, thus reducing the business risk from lost emails.

USER, CORPORATE OR ADMINISTRATOR ACCESS OPTIONS

EASY TO USE RETRIEVAL FROM ENCRYPTED ARCHIVE

BACKUP FAILURE RECOVERY OPTION WITH INSTANT ACCESS TO PREVIOUS 7 DAYS EMAIL

INTEGRAL PART OF ANY DISASTER RECOVER PLAN.
