Unit Investment Trusts ("UITs")

Delta Global Basic Needs Portfolio, Series 1

Portfolio Objective and Principal Investment Strategy

The Trust seeks to maximize total return primarily through capital appreciation by investing in a portfolio of foreign companies. Under normal circumstances, the Trust will invest at least 80% of the value of its assets in stocks of companies that derive their main source of revenue from producing the basic needs of a developing society. The Sponsor has selected Delta Global Advisors, Inc. ("Delta Global") to serve as the Trust's portfolio consultant. The portfolio consultant is responsible for selecting the Trust's portfolio. The Trust consists of securities of companies in the water, agriculture, energy, and raw materials sectors that Delta Global believes may appreciate in value. Delta Global believes these industries are essential to the development of societies around the globe. The Trust will consist of American Depositary Receipts ("ADRs"), U.S.-listed foreign securities and foreign securities traded on foreign exchanges.

Security Selection

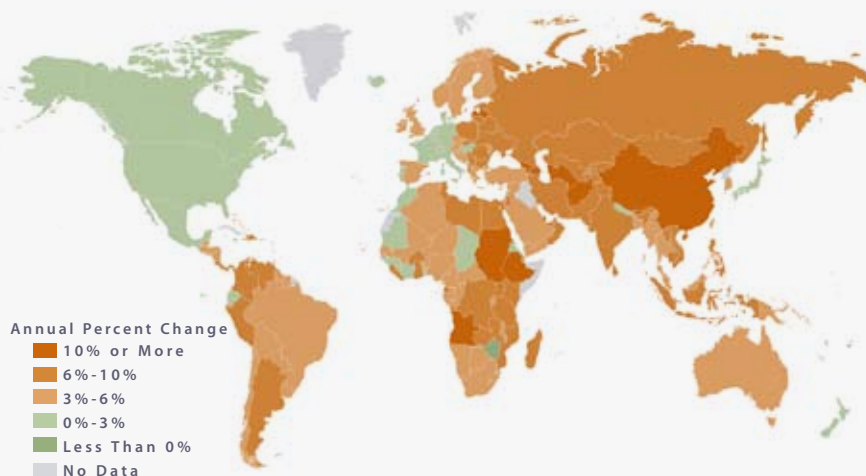

Delta Global has selected securities of companies that derive their main source of revenue from producing the building blocks of an emerging society: agriculture, water infrastructure and raw materials (including basic materials, energy and industrial metals). The Trust is globally diversified with stocks of companies that Delta Global believes should benefit from an emerging middle-class throughout the world. Delta Global's selection process is fundamental in nature, with a portfolio weighting process that identifies companies that are industry leaders. Delta Global analyzes a company's valuations versus its peers taking into consideration measures such as, but not limited to, the price/earnings multiple, price/earnings to growth and price-to-book value. In its selection process, Delta Global will also take into consideration a company's proximity to and connection with emerging markets and, when possible, the company's potential as a buyout candidate.

Back to the Basics

Currently, the world is experiencing robust rates of economic growth. Developing countries like China, Singapore and India are playing a principal role in spurring this growth. The world map to the right reveals, in real GDP terms, that the developing world grew at a faster pace than developed nations during 2007.

The necessities of any society include raw materials, agriculture and water infrastructure. Developing countries are still in the process of meeting the need for many of these essentials. Basic construction materials and raw energy are needed to fuel expanding cities and increasing water infrastructure is vital to support this development. Therefore, in order for growth in the developing world to continue at this pace, these basic needs must be addressed.

Risk Considerations

As with all investments, you can lose money by investing in this Trust. The Trust also might not perform as well as you expect. This can happen for reasons such as these: Stock prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. These can include stock market movements, purchases or sales of securities by the Trust, government policies, litigation, and changes in interest rates, inflation, the financial condition of the securities' issuer or even perceptions of the issuer.

The Sponsor does not actively manage the portfolio. The Trust will generally hold, and may continue to buy, the same securities even though a security's outlook, market value or yield may have changed.

Share prices or dividend rates on the securities may decline during the life of the Trust. There is no guarantee that the issuers of the securities will declare dividends in the future and if declared, whether they will remain at current levels or increase over time.

The Trust invests in securities of companies in the Basic Materials sector. General risks of companies in the Basic Materials sector include the general state of the economy, consolidation, domestic and international politics and excess capacity. In addition, Basic Materials companies may also be significantly affected by volatility of commodity prices, import controls, worldwide competition, liability for environmental damage, depletion of resources and mandated expenditures for safety and pollution control devices.

The Trust invests in ADRs and foreign securities. The Trust's investment in ADRs and foreign securities presents additional risk. ADRs are issued by a bank or trust company to evidence ownership of underlying securities issued by foreign corporations. Foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls with respect to certain industries or differing legal and/or accounting standards.

The Trust may invest in companies that are considered to be passive foreign investment companies ("PFICs"). PFICs are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income. As a result of an investment in PFICs, the Trust could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is distributed to its unitholders in a timely manner. The Trust will not be able to pass through to its unitholders any credit or deduction for such taxes.

Risk considerations continued on page 3.

Risk Considerations (Continued)

The Trust may include securities issued by companies located in emerging markets. Emerging markets are generally defined as countries with low per capita income in the initial stages of their industrialization cycles. The markets of emerging markets countries are generally more volatile than the markets of developed countries with more mature economies. All of the risks of investing in foreign securities described above are heightened by investing in emerging markets countries.

The Trust invests in stocks issued by small-capitalization and mid-capitalization companies. These stocks customarily involve more investment risk than stocks of larger capitalization companies. Small-capitalization and mid-capitalization companies may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. Inflation may lead to a decrease in the value of assets or income from investments.

Inflation may lead to a decrease in the value of assets or income from investments.

Please see the Trust prospectus for more complete risk information.

Portfolio Summary

Inception Date	December 13, 2007
Termination Date	December 16, 2009
Initial Offer Price	\$10.00
Minimum Investment	\$250.00
Number of Issues	38
Historical Dividend Distribution**	\$0.1088
Distributions*	Monthly, if any

*Distributions, if any, will be made monthly commencing January 25, 2008.

**The amount of distributions of the Trust may be lower or greater than the above-stated amount due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in trust expenses or the sale or maturity of securities in the portfolio. Fees and expenses of the Trust may vary as a result of a variety of factors including the Trust's size, redemption activity, brokerage and other transaction costs and extraordinary expenses.

Ticketing Information

CUSIP (cash payment)	18386B549
CUSIP (reinvestment accounts)	18386B556
CUSIP (fee-cash)	18386B564
CUSIP (fee-reinvest)	18386B572
Ticker	CDGNAX

Sales Charges

The sales charge ("S/C") is based on a \$10 per unit offering price.

	Amount Per Unit	Max Per Unit (%)
Up-front S/C	\$0.100	1.00%
1st Year Deferred S/C	\$0.245	2.45%
C&D Fee	\$0.050	0.50%
Total S/C	\$0.395	3.95%

The deferred sales charges will be deducted in September through November of 2008, or upon early redemption.

For unit prices other than \$10, percentages of initial sales charge, C&D fees and deferred sales charges will vary. Early redemption of units will still cause payment of the deferred sales charge.

Volume Discount Breakpoints

The following sales charge reductions are as a % of the Public Offering Purchase Amount Price.

Purchase Amount	Total Sales Charge
Less than \$50,000	3.95%
\$50,000 - \$99,999	3.70%
\$100,000 - \$249,999	3.45%
\$250,000 - \$499,999	3.20%
\$500,000 - \$999,999	2.45%
\$1,000,000 or more	1.75%

UITs are fixed and not actively managed. You can lose money by investing in the Trust. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning foreign securities and ADRs. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. There is no guarantee that the portfolio will achieve its investment objective. The economic condition of the issuers of the securities in the portfolio as well as the stock market, in general, may worsen and therefore reduce the value of the units of the portfolio.

This UIT is a long-term strategy, and investors should consider their ability to invest in successive portfolios at the applicable sales charge, if available. There are tax consequences associated with an investment from one series to the next. Investors should consult their tax advisor to determine tax consequences associated with an investment from one portfolio to the next. Units of the portfolio may be well suited for purchase by Individual Retirement Accounts or other qualified retirement plans. Consult your attorney or tax advisor regarding tax consequences associated with units held outside one of these tax-deferred vehicles. Claymore Securities, Inc. does not offer tax advice.

Investors should consider the investment objectives and policies, risk considerations, charges and ongoing expenses of the UIT carefully before investing. The prospectus contains this and other information relevant to an investment in the Trust. Please read the prospectus carefully before you invest or send money. If a free prospectus did not accompany this literature, please contact your securities representative or Claymore Securities, Inc.
