Unit Investment Trusts ("UITs")

Delta Global Basic Services Portfolio, Series 1

Portfolio Objective and Principal Investment Strategy

The Delta Global Basic Services Trust seeks to maximize total return primarily through capital appreciation by investing in a portfolio of foreign companies. Under normal circumstances, the Trust will invest at least 80% of the value of its assets in stocks of companies that derive their main source of revenue from producing the basic services infrastructure of emerging societies. The Sponsor has selected Delta Global Advisors, Inc. ("Delta Global") to serve as the Trust's portfolio consultant. The portfolio consultant is responsible for selecting the Trust's portfolio. The Trust consists of securities of companies in the utilities, telecommunications, infrastructure, roads, railroads, ports and airports areas of the market that Delta Global believes should appreciate in value. Delta Global believes that the companies selected may be positioned to benefit from an increase in global growth in these service-oriented industries. The Trust will consist of American Depositary Receipts ("ADRs"), U.S.-listed foreign securities and foreign securities traded on foreign exchanges.

Security Selection

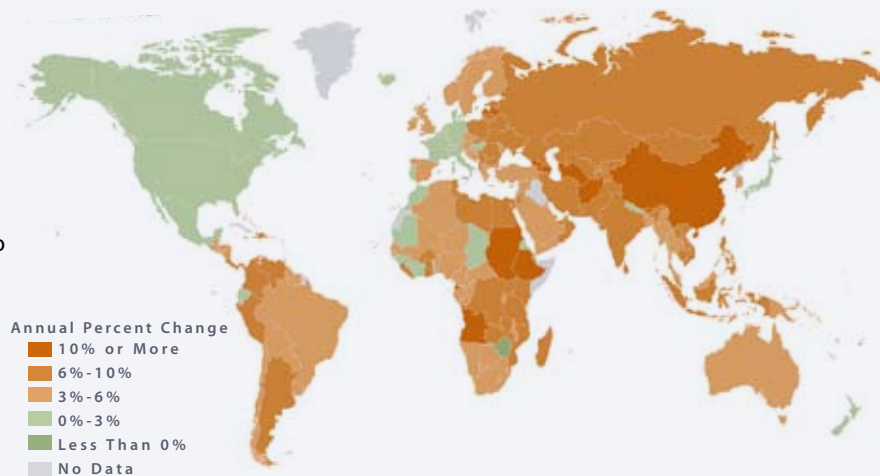

Delta Global has selected securities that derive their main source of revenue from producing the basic services infrastructure of emerging societies, including: utilities, telecommunications, ports, airports, roads, and railroads. The Trust's portfolio is globally diversified with stocks of companies that Delta Global believes should benefit from an emerging-middle class throughout the world. Delta Global's selection process is fundamental in nature, with a portfolio weighting process that identifies companies that are industry leaders. Delta Global analyzes a company's valuations versus its peers taking into consideration measures such as, but not limited to, the price/earnings multiple, price/earnings to growth and price-to-book value. In its selection process, Delta Global will also take into consideration a company's proximity to and connection with emerging markets.

Back to the Basics

Currently, the world is experiencing robust rates of economic growth. Developing countries like China, Singapore and India are playing a principal role in spurring this growth. The world map to the right reveals, in real GDP terms, that the developing world grew at a faster pace than developed nations during 2007.

In order for these developing countries to thrive, the demand for expanding transportation, utility and telecommunication systems must be met. Railroads, sea ports, and roads make growth feasible by providing the essential infrastructure to move materials and goods. Likewise, utilities are needed to provide power to growing cities and industries. Telecommunication plays a key role in sustaining this growth by linking people and business operations. These basic services are the enabling means to sustain economic growth among developing countries.

Risk Considerations

As with all investments, you can lose money by investing in this Trust. The Trust also might not perform as well as you expect. This can happen for reasons such as these: Stock prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. These can include stock market movements, purchases or sales of securities by the Trust, government policies, litigation, and changes in interest rates, inflation, the financial condition of the securities' issuer or even perceptions of the issuer.

The Sponsor does not actively manage the portfolio. The Trust will generally hold, and may continue to buy, the same securities even though a security's outlook, market value or yield may have changed.

Share prices or dividend rates on the securities may decline during the life of the Trust. There is no guarantee that the issuers of the securities will declare dividends in the future and if declared, whether they will remain at current levels or increase over time.

The trust includes stocks issued by companies in the Industrial sector. Companies in the Industrial sector are affected by a number of factors including the general state of the economy, intense competition, domestic and international politics, excess capacity and spending trends.

The Trust includes securities from the Utility sector. Adverse developments in this sector may significantly affect the value of your units. Companies involved in the Utility sector must contend with environmental considerations, taxes, government regulation, price and supply fluctuations, competition and energy conservation.

The Trust invests in ADRs and foreign securities. The Trust's investment in ADRs and foreign securities presents additional risk. ADRs are issued by a bank or trust company to evidence ownership of underlying securities issued by foreign corporations. Foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls with respect to certain industries or differing legal and/or accounting standards.

Risk considerations continued on page 3.

Mid-Cap	71.53%
Small-Cap	1.01%

Risk Considerations (Continued)

The Trust may invest in companies that are considered to be passive foreign investment companies ("PFICs"). PFICs are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income. As a result of an investment in PFICs, the Trust could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is distributed to its unitholders in a timely manner. The Trust will not be able to pass through to its unitholders any credit or deduction for such taxes.

The Trust may include securities issued by companies located in emerging markets. Emerging markets are generally defined as countries with low per capita income in the initial stages of their industrialization cycles. The markets of emerging markets countries are generally more volatile than the markets of developed countries with more mature economies. All of the risks of investing in foreign securities described above are heightened by investing in emerging markets countries.

The Trust invests in stocks issued by mid-capitalization companies. These stocks customarily involve more investment risk than stocks of larger capitalization companies. Mid-capitalization companies may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. Inflation may lead to a decrease in the value of assets or income from investments.

Please see the Trust prospectus for more complete risk information.

Portfolio Summary

Inception Date	December 13, 2007
Termination Date	December 16, 2009
Initial Offer Price	\$10.00
Minimum Investment	\$250.00
Number of Issues	27
Historical Dividend Distribution**	\$0.3274
Distributions*	Monthly, if any

*Distributions, if any, will be made monthly commencing January 25, 2008.

**The amount of distributions of the Trust may be lower or greater than the above-stated amount due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in trust expenses or the sale or maturity of securities in the portfolio. Fees and expenses of the Trust may vary as a result of a variety of factors including the Trust's size, redemption activity, brokerage and other transaction costs and extraordinary expenses.

Ticketing Information

CUSIP (cash payment)	18386B580
CUSIP (reinvestment accounts)	18386B598
CUSIP (fee-cash)	18386B606
CUSIP (fee-reinvest)	18386B614
Ticker	CDGSAX

Sales Charges

The sales charge ("S/C") is based on a \$10 per unit offering price.

	Amount Per Unit	Max Per Unit (%)
Up-front S/C	\$0.100	1.00%
1st Year Deferred S/C	\$0.245	2.45%
C&D Fee	\$0.050	0.50%
Total S/C	\$0.395	3.95%

The deferred sales charges will be deducted in September through November of 2008, or upon early redemption.

For unit prices other than \$10, percentages of initial sales charge, C&D fees and deferred sales charges will vary. Early redemption of units will still cause payment of the deferred sales charge.

Volume Discount Breakpoints

The following sales charge reductions are as a % of the Public Offering Purchase Amount Price.

Purchase Amount	Total Sales Charge
Less than \$50,000	3.95%
\$50,000 - \$99,999	3.70%
\$100,000 - \$249,999	3.45%
\$250,000 - \$499,999	3.20%
\$500,000 - \$999,999	2.45%
\$1,000,000 or more	1.75%

UITs are fixed and not actively managed. You can lose money by investing in the Trust. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning foreign securities and ADRs. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. There is no guarantee that the portfolio will achieve its investment objective. The economic condition of the issuers of the securities in the portfolio as well as the stock market, in general, may worsen and therefore reduce the value of the units of the portfolio.

This UIT is a long-term strategy, and investors should consider their ability to invest in successive portfolios at the applicable sales charge, if available. There are tax consequences associated with an investment from one series to the next. Investors should consult their tax advisor to determine tax consequences associated with an investment from one portfolio to the next. Units of the portfolio may be well suited for purchase by Individual Retirement Accounts or other qualified retirement plans. Consult your attorney or tax advisor regarding tax consequences associated with units held outside one of these tax-deferred vehicles. Claymore Securities, Inc. does not offer tax advice.

Investors should consider the investment objectives and policies, risk considerations, charges and ongoing expenses of the UIT carefully before investing. The prospectus contains this and other information relevant to an investment in the Trust. Please read the prospectus carefully before you invest or send money. If a free prospectus did not accompany this literature, please contact your securities representative or Claymore Securities, Inc.
