SugarMaps CRM Plug-in

Imagine the possibilities

Intelestream is proud to introduce SugarMaps, a solution that lets users to do a whole lot more with SugarCRM. By fusing Google Maps technology with the world's leading commercial open source CRM application, **the possibilities have just become limitless**.

Affordable and immediately available

SugarMaps is sold at an attractive low price and can be downloaded directly from Intelestream's website. Integration into all editions of SugarCRM is seamless and can be completed in less than five minutes. **SugarMaps can improve your CRM experience today**.

Leading support and customizations

By signing up for SugarMaps, your company will have access to the world's leading SugarCRM experts. Intelestream professional services personnel can customize the plug-in to meet your organization's specific needs and our support team will be on standby to ensure **SugarMaps runs smoothly for you.**

There are many things you can do with SugarMaps

Draw maps from reporting results. Use sophisticated SugarCRM reports to filter your contacts, accounts, and users according to virtually any imaginable criteria. For companies requiring tailored customizations from Intelestream, this feature can be further expanded.

View maps according to radius searches. All contacts, accounts, and users can be displayed within a number of geographical radiuses directly in the mapping module.

Map Icons that change according to search results. SugarMaps can be customized to allow items on the map to be displayed in various colors/icon sizes according to criteria such as an account's revenue, number of employees, and win probability.
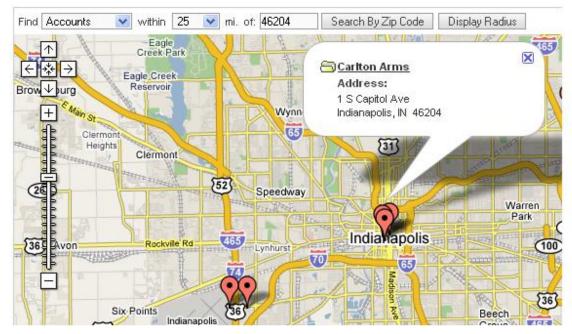

Coordinate sales calls and delivery logistics. With SugarMaps, users can print driving directions for contacts found within a SugarCRM instance. Reporting results and radius searches on the map can be used as waypoints for effective journey planning.
