

Example of iMVI Market Volatility Data: MSA Orlando, Florida

MSA Statistics:

- Sales in Orlando declined by 44% in October 2007 from one year earlier.
- Year-to-date sales for 2007 are down by 39% over the same period in 2006.
- Housing inventory is up by 29% with 25.46 months of inventory.
- 4.71% of all loan payments are overdue.

iMVI Findings:

- Many neighborhoods continue to appreciate despite performance indicators at an MSA level.

The above iMVI heat map illustrates price appreciation and the severity of price depreciation within Orlando. As demonstrated here, MSA, county and zip code statistics don't provide an accurate indication of market condition.
