

# NetControl for Exchange

## Control your Exchange environment for more simplified e-mail management

The massive number of e-mails that go through an organization each day makes managing the Exchange system increasingly complex and time-consuming. That goes without saying.

But new e-mail management issues continue to emerge:

- How do you meet the increasing number of compliance requirements your organization faces?
- How do you quickly retrieve e-mail content—either at a user’s request or for e-discovery and litigation?
- How do you archive and store the massive number of e-mails that go through your organization?
- Finally, how do you justify Exchange investments—and measure and report on SLAs and usage for chargeback, and automate message diagnostics—without knowing e-mail usage and trends?

With NetControl for Exchange, you can easily manage e-mail usage and justify Exchange investments, efficiently archive and store e-mail content, and instantly recover e-mail messages. Deploy once, manage once, and finally get control over your Exchange environment.

- **Justify Exchange investments and improve planning.** Easily justify hardware and software upgrades, plus additional staffing, with Exchange usage reports showing storage and usage trends over time. Improve capacity and migration planning with long-term historical reporting and analysis on message traffic levels, storage usage, and user activity.
- **Archive and store e-mail content to meet retention laws.** Control data, eliminate duplicate messages, and archive public folders and mailboxes to reduce e-mail storage requirements and improve Exchange Server performance—and help your organization meet e-mail retention laws.
- **Speed recovery of e-mail content.** Stop taking hours and days to hunt through backup tapes, restore e-mail stores, and maintain “restore” servers—just to recover a single message. Instantly recover e-mail content requested by users, or to meet requests for e-discovery and litigation.

**NETPRO**  
YOUR IT INFRASTRUCTURE. Simplified.

[www.netpro.com](http://www.netpro.com)

NetPro offers tightly integrated solutions that make Exchange management easier and more effective.

**ChangeAuditor:** Automate Exchange tracking and reporting.

**NetControl:** Control Exchange usage, storage, and message recovery.

**NetMigrate:** Migrate to Exchange 2000, 2003, or 2007.

### NetControl for Exchange Modules

- ▶ **Message Analysis** – E-mail usage reporting and analysis
- ▶ **Archive** – Online archiving of Exchange messages
- ▶ **Recovery** – Instant e-mail content recovery

### NetControl for Exchange helps with:

- E-MAIL STORAGE
- MESSAGE RECOVERY
- REPORTING & ANALYSIS
- E-DISCOVERY & INVESTIGATIONS
- REGULATORY COMPLIANCE

NETPRO EXCHANGE SOLUTIONS

## MESSAGE ANALYSIS

Get detailed management reporting for Exchange, including chargeback reports that help you allocate the cost of your messaging infrastructure, plan for future growth, and identify areas of concern before they become problems.

### Justify Exchange investments and improve planning.

Justify the need for Exchange investments with actual storage and usage trends over time. Improve capacity and migration planning with long-term historical reporting and analysis on message traffic levels, storage usage, and user activity.

### Charge back messaging system costs and achieve service levels.

Charge Exchange costs back to departments that most impact operating costs. Then easily manage service level agreements by showing how quickly messages are delivered.

### Comply with e-mail acceptable use policies and industry regulations.

Report on e-mail activity for individual users, Internet domains, suspect SMTP addresses, keywords, and attachments within all messages to protect your intellectual property and ensure compliance.

**Storage Cost Per Mailbox**  
**Description:** Displays the storage cost per mailbox sorted descending by size.  
**Database:** NCMMessageAnalysisReporting

**Organization:** All      **Admin Group:** All  
**Server:** All      **Storage Group:** All  
**Information Store:** All      **Department:** All

**Report Details**

Organization	Mailbox	Last Access Date	Size (MB)	Count	Cost Of Storage
Exchange 2000 Environment					
<i>Organization Average</i>			43.64	114	\$43.15
<b>Organization Total</b>			<b>567.35</b>	<b>1,478</b>	<b>\$561.00</b>
<i>Average</i>			43.64	114	\$43.15
<b>Total</b>			<b>567.35</b>	<b>1,478</b>	<b>\$561.00</b>

## Sample Reports

- SLA and Cost Reports
- Information Storage Reports
- Mailbox Storage Reports
- Tracking Log Reports
- System Information

## Key Features

- ▶ Simple installation and ease of use for fast deployment in hours, not days and weeks.
- ▶ Does not require installation of an agent on the Exchange server for data collection.
- ▶ Centralized reporting from distributed Exchange servers including message traffic analysis, server, and mail store storage metrics plus Exchange configuration information.
- ▶ Built-in reporting library with automated, scheduled collection and reporting.
- ▶ Single global reporting database for multiple Exchange organizations.
- ▶ Single merged reporting across tracking logs from multiple servers.
- ▶ Consolidated, compressed, and archived tracking logs automate the discovery process to quickly see message flow.
- ▶ Windows-like search capabilities for fast searching, filtering, and sorting through large amounts of e-mail traffic data.
- ▶ OLAP cube technology processes data fast and efficiently for advanced analysis and trending.

## ARCHIVE

Regulatory demands, e-discovery, and litigation increasingly require effective e-mail archiving and storage. NetPro offers a comprehensive, wizard-based solution to help you efficiently manage e-mail archiving, search, and discovery to quickly meet compliance requirements.

- **Reduce legal risks, respond to discovery requests, and prove compliance with Sarbanes-Oxley, HIPAA, and other requirements** by instantly recovering indexed, archived, and encrypted e-mails.
- **Reduce storage requirements and improve Exchange Server performance** by controlling data, eliminating duplicate messages, and archiving PSTs, public folders, and mailboxes.
- **Reduce the time, cost, and risk of an Exchange 2007 migration** by archiving all messages into a single repository prior to migration.

## RECOVERY

Recovering deleted e-mail to satisfy users' requests or for e-discovery means delving into numerous backup files or performing brick-level backup—both costly and time-consuming procedures. NetPro features fast restores from a previous full backup and easy access to archived e-mail.

- **Slash restore time** by recovering individual mailboxes, folders, or any number of messages and attachments directly to your production Exchange server or to a PST file.
- **Speed e-discovery and guarantee compliance** by quickly locating messages in specific backup files, whether stored locally or remotely.
- **Reduce space, cost, and time associated with brick-level backups** by eliminating individual mailbox backup.

## Key Benefits

- ▶ Justify Exchange management expenses based on actual storage and usage trends over time.
- ▶ Charge messaging system costs back to users or departments for e-mail and storage resources use.
- ▶ Improve capacity management with historical data on message traffic levels, storage usage, and user activity.
- ▶ Achieve service levels with metrics that help evaluate areas for improvement and adjust server traffic to better meet demand.
- ▶ Comply with e-mail acceptable use policies and industry regulations.
- ▶ Increase migration efficiencies by eliminating unnecessary Distribution Lists.
- ▶ Troubleshoot Exchange issues quickly by instantly searching, filtering, and sorting tracking logs.
- ▶ Reduce overhead and save time with integrated NetControl architecture—and get message analysis, recovery, and archive from one place.

# NetControl for Exchange

## Built on the NetControl architecture for more simplified IT management.

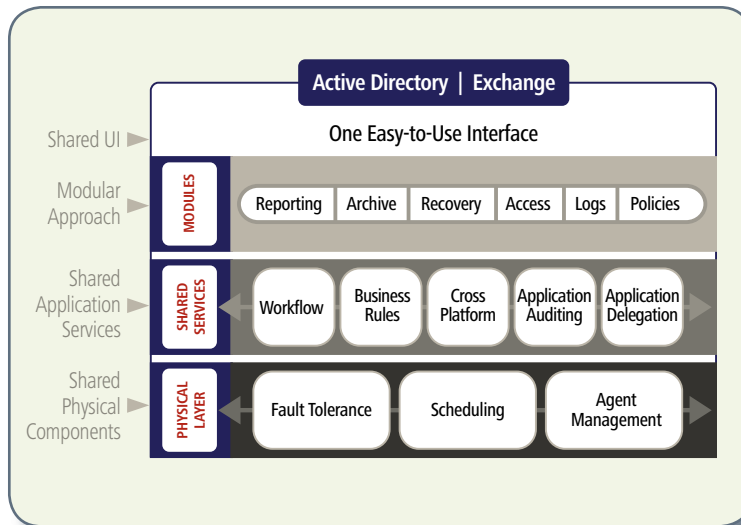

Many tools. Numerous point solutions. Multiple vendors. These add up to bloated and piecemeal infrastructures that are more complex, costly, and out-of-control than they need to be. Making it difficult for organizations to grow and efficiently manage their IT infrastructures.

NetControl simplifies Active Directory and Exchange management—access, logs, reporting, restoration, policies, and more—by integrating critical tools into one architecture with one interface. Simply deploy once and manage once. And finally get control.

**Integrated architecture so you can do more with the time you have.** NetControl unifies critical Exchange management tools—message analysis, archive, and recovery—into one architecture with one interface. No more complex deployments, multiple interfaces, scattered upgrades, or products that don't integrate. Deploy once, schedule upgrades, pull reports—all from a single management console.

**Fast, enterprise-wide deployment without added cost or complexity.** With NetControl, deploy agents strategically—by geography, function, or business unit—and include enhanced fault tolerance to ensure that work is performed. Then deploy once and manage once. As your business requirements grow, simply add new modules in just a few minutes.

**Simplified change control for more effective infrastructure management.** Through its wizard-assisted interface, NetControl shares services so you can easily create approval-based processes, business rules, naming conversions, and more. Set it up once and share it across Active Directory and Exchange tools to optimize administration of access, logs, reporting, restoration, policies, and more.

## The NetPro Difference

Simplify your IT infrastructure... better for less!

- ▶ Fast deployment with new capabilities in minutes.
- ▶ Deeper coverage and instant knowledge across Microsoft systems.
- ▶ Microsoft-like experience—minimal training needed.
- ▶ Proven experts, industry standards supported.
- ▶ Customer driven, customer recommended.

## About NetPro

As 15-year Infrastructure Optimization software experts, NetPro drives security and compliance by extending and enhancing Microsoft technologies to simplify your IT infrastructure better for less. From Active Directory and Exchange to SharePoint and Server environments, NetPro solutions feature an integrated architecture with a Microsoft-like experience and the industry's easiest deployment. Our award-winning solutions are used by some of the world's largest and most complex infrastructures including the U.S. Army, National Institutes of Health, Coors Brewing, and General Electric.
