Esnatech & Iwatsu Voice Networks Release Enterprise Suite Version 2.0 for the Small to Medium size Businesses (SMB)

As the next generation Unified Communications platform for SMB market place, Iwatsu Enterprise Suite Version 2.0 Delivers gateway solutions that interface existing business applications and provides immediate value to day to day business communications

Richmond Hill, Ontario, Canada, Irving Tx, USA February 8, 2008—Esna Technologies Inc. (Esnatech) & Iwatsu Voice Networks (IVN) today announced the release of Version 2 of Iwatsu Enterprise Suite. Enterprise Suite is a comprehensive communications solution that combines the advanced call processing solution of Iwatsu's IP PBX and Esna's unified communications platform, Enterprise Communications Server v.4 and best in breed unified communications solution from Esnatech's Telephony Office-LinX v7.1. Enterprise Suite Version 2 that provides the seamless unification of telephony, mobility, messaging, and enterprise presence to allow SMB companies to cost effectively change they way they communicate from latent e-mailbox inbox response to proactive real time live communications.

A leading provider of unified communications solutions, Esnatech has long been a leader in Communication applications. Merging the power of the Esnatech application server with the robustness of the Iwatsu IP telephony infrastructure makes Iwatsu Enterprise Suite Version 2 the most complete platform in the industry today, offering a wide range of unified communication applications such as unified messaging, fixed to mobile convergence, enterprise presence, instant messaging, SMS messaging, fax server, IVR, speech recognition and call routing in a simple single platform solution.

"Iwatsu Enterprise Suite will give SMB's the same productivity enhancing tools usually found in communications solutions of Fortune 1000 companies for a fraction of the cost" says Don Gant, VP Channel Marketing and Business Development. "Having a feature rich UC platform that combines sophisticated call processing in one integrated platform will give SMB's the ability to improve their business processes while maintaining expenses."

Enterprise Suite Version 2.0 adds support for MS Exchange 2007®, MS Office 2007®, and fax messaging over SIP. It delivers tremendous value for organizations from 25 to 500 users and can seamlessly work with any email/group ware environment as well as integrate any mobile phone device into the IP telephony infrastructure.

The merger of voice, fax and speech through SIP integration reduces the cost of hardware, provides flexibility in terms of deployment location and remote site support, as well as support for high availability and resiliency requirements. "Iwatsu Enterprise Suite delivers an end to end solution for ALL communication media focused on the SMB space. Most vendors either ignore this business segment or deliver a very watered down platform for this customer segment. Jointly Iwatsu and Esnatech have validated the requirement for unified communications in the SMB solution by providing a robust feature rich platform that meets their exact requirements for mobility and simplicity to improve their overall business process and make them more effective in their day to day business operations", says Davide Petramala VP Sales and Marketing, Esnatech. "This enterprise communication suite will allow us to provide seamless integration into different business applications and deliver real time availability of content from any access point to our customers."

Enterprise Communications Suite is already tightly integrated with Microsoft Windows[®], MS Exchange[®], IBM Lotus Domino[®], Novell GroupWise[®], Research in Motion Blackberry[®], Nokia devices, and MS Windows Mobile[®] devices. The gateway server can be administered directly from an organization's Microsoft Management Console or through Terminal Services over the web. Users can be managed through Active Directory and Group Policy.

About Esnatech

Founded in 1989, Esnatech's mission is to provide **communication solutions that are simply the best way to communicate!** Esnatech solutions empower organizations by giving them the flexibility to conduct business at any time, from anywhere, so they can manage the information they need, when they need it.
