Growth & profitability: the community effect

Last year's TradeNet Conference majored on how marketing and sourcing could be brought together to create The Perfect Match. One year on, we explore the impact of maritime buyers and suppliers using the internet to easily find each other, connect cost effectively and trade efficiently. In the last twelve months we have seen an exceptional growth in the number of trading partners connecting together, and at CONNECT08 we will share how all Buyers, Suppliers and Logistics Providers can benefit from this "community effect".

Whether you are a Supplier wanting to attract new customers, a Buyer needing to source new Suppliers or you just want to use the internet for enabling existing purchasing relationships, CONNECT08 will show you how you can grow your business and drive significant profits by strengthening online relationships and better managing businesses processes.
