LUCAS SYSTEMS AND Q DATA LAUNCH PARTNERSHIP TO DELIVER JENNIFER™ VOICE SOLUTIONS IN CANADA

Partnership Focuses on Delivering Voice-Enabled Warehouse Management
Leveraging Motorola Open Mobile Devices

PITTSBURGH, PA, and TORONTO, ONT, February 27, 2008 – Lucas Systems, Inc., the leading provider of voice-directed warehouse applications for open, mobile computers, and Q data, Inc., a leading provider of warehouse management and mobile data collection solutions, today announced a partnership to deliver Jennifer™ voice solutions to customers throughout Canada. Jennifer™, by Lucas, is the leading voice logistics application for Motorola® industrial mobile computers, with thousands of users running Motorola MC9000, MC3000, and WT4000 computers.

"Demand for Jennifer™ continues to grow as more and more distribution center and supply chain executives look for an open, adaptable voice solution providing greater operational gains than a canned WMS add-on," said Jeff Slevin, COO of Lucas Systems. "Q data's warehouse management expertise, their broad customer-base of distribution centers, and their sales and delivery offices throughout Canada will help us to reach more of these customers. We are especially pleased to team up with Q data as they share our commitment to exceeding customer expectations in every product and project they deliver."

Jennifer™, the Lucas voice solution, is the first voice-directed logistics solution designed from the ground up to run on open, industry standard portable computers. Jennifer™'s worker-friendly voice and innovative, efficient voice dialogues improve productivity and eliminate errors throughout the distribution center (from receiving to voice picking to truck loading). Likewise, Jennifer™ gives managers configurable labor management, process management, and reporting capabilities that allow them to better manage and adapt operations to reduce costs and maximize perfect orders.

"We are very excited to be partnering with Lucas," said Jeff Lem, President and CEO of Q data. "The Jennifer solution will be the perfect compliment to RF Plus. We're looking forward to introducing Jennifer to the Canadian marketplace."

About Q data, Inc.
Q data Inc is a leading international integrator of bar coding, RFID and wireless solutions. With over 4,000 installations across North America, Q data has earned the reputation of delivering innovative and powerful solutions that generate a high return on investment. From simple bolt-on products to enterprise-wide systems, Q data has the skills and experience to deliver solutions tailored to your specific needs on time and on budget. For more information, visit www.qdata.com.

About Lucas Systems, Inc.
Lucas Systems has delivered more voice-directed distribution center solutions on a wider variety of mobile computers than any other company. Customers like Cardinal Health, C&S Wholesale Grocers, CVS/pharmacy, Kraft Nabisco, and OfficeMax trust Lucas to deliver solutions that greatly improve worker productivity and accuracy because Lucas truly understands warehouse operations. Jennifer™, the Lucas voice solution, communicates with warehouse associates through a headset connected to an open, industry standard multi-modal mobile computer. Jennifer creates a conversation with warehouse workers that frees their hands and eyes to focus on the job at hand, reducing errors while increasing efficiency.
