Press Release

American Trim announces integrated E-Coat and Powder Coat line at its Sidney, Ohio facility

The new integrated line combines the value of E-Coat with the cosmetic durability and QUV protection of powder paint in one efficient processing line

Lima, Ohio—February 27, 2008

Today, American Trim announced that the new integrated E-Coat and Powder Coat line is operational and ready to support full production and prototyping. With this opening, American Trim advances the thinking in process cost reduction and efficiency becoming one of the few companies of any size to offer this capability in the world. The line is now in service for its in-house manufactured products as well as a coating source to customers

Benefits of the New Integrated Line

- Efficient manufacturing flow
- Integrated powder paint/cosmetic finish
- Supports any color
- Salt spray and QUV protection
- Approved by all automotive and Heavy Truck OEM

Capabilities

- Three Class A Booths supporting:
 - Primary Colors (black, white, gray and silver)
 - Vibrant colors
 - Clear protective top coat
- Supports any metal substrate
 - Up to 96" X 48" X 28"

"American Trim is committed to providing integrated solutions for our current and prospective customers which enhance the appearance, performance and value of their products," commented Chris Highfield, Director of Sales for American Trim.

Inquiries or requests for quotes using the integrated E-Coat/Powder Coat line should be emailed to Chris Highfield (chighfield@amtrim.com), Sales Director or you may call him directly at 937-494-6024.
