# Full-featured application and network monitoring — simplified

Heroix Longitude is the powerful, simple, and easy to use application performance and network monitoring software that helps you manage your IT infrastructure for maximum performance and availability. Award-winning Longitude delivers the automated, multiplatform capabilities you need to support the highest possible service levels for your organization.

With no agents to install and a wealth of packaged monitoring solutions, Longitude lets you get started in minutes. Then use the Web-based interface and real-time Event Monitor to view how your environment is performing, receive proactive alerts, reveal root causes, automate corrective actions, tailor your monitoring, set up service level agreements (SLAs), and generate perform- ance reports. Enterprises large and small value Longitude for its effectiveness, simplicity, and affordability.

Key Features

- Hundreds of vital operational metrics and key performance indicators monitored out of the box
- Monitors broad spectrum of operating systems, network devices and applications
- Proactive alerts and actions
- Real-time Event Monitor serves as central console
- Real-time Statistics Dashboard
- Integrated performance reports and graphs for root cause analysis, resource planning, and documenting service levels
- Visibility into business service levels with user experience monitoring and SLAs
- Built-in best practices
- Easy to tailor

Maximum Results with Minimum Effort and Cost

- Agentless
- No prerequisite software
- Deploys immediately
- Web-based interface lets you monitor from anywhere
- Speeds troubleshooting: drill down for details and customize without leaving the Event Monitor
- Identifies root causes
- Scales to any size enterprise
- Detailed visibility into multi-tiered applications & business processes

Map and view monitored components by logical or physical hierarchy; view service levels from a business perspective.
