Analysis

Despite the positive swing in 2006, radio Web sites returned to their negative trend in 2007. Radio sites have underperformed the overall ISAR index seven out of ten years. These sites underperformed the 5-year criteria benchmark scores in all areas. Within their industry, they are strongest at content, copywriting, and interactivity.

Many radio sites are overcrowded with content and promotions supporting multiple personalities.

About this Report

The Web Marketing Association has collected industry Web site development benchmark data since 1997 through its WebAward program. Multiple independent judges review and score each site from 0-10 points on each of seven criteria for a possible 70 points. Best of Industry WebAward is given to the site that scores highest in the industry. The views of this report are based on observations of aggregated industry data and do not reflect the results for any particular Web site unless noted. For complete information, go to www.webaward.org
