Copywriting	7.6	7.3	7.7	7.3	7.8
Ease of use	7.4	7.8	7.5	7.6	8.0

Score out of a possible 10 points

Average Scores by Judging Criteria Chart

Analysis

Home building Web sites have outperformed the ISAR index every year they competed. These sites have beaten the 5-year criteria benchmark averages in ease of use. They have matched the benchmark in design, technology, and interactivity. They have only narrowly underperformed the benchmarks in innovation, content, and copywriting. As an industry, they are strongest in content, design, and ease of use. They could use improvement in innovation and technology.

The best home building Web site are leaders in terms of using new media to provide tours and product demonstrations online. However, there are still many sites within this industry that are nothing more than simple online billboards or digital sales brochures.

Industry vs ISAR 5-Year Average By Criteria

Best of Industry Winners

Year	Winner	Web site
2007	Creative Digital Group	The Home Depot Roofing, Siding, Windows
2006	Hanley Wood LLC	BUILDER Online
2005	Critical Mass	Andersen Windows
2004	Liggett-Stashower Interactive	Crane Performance Siding Web Site
2003	Emco Building Products Corp.	DreamRoofs.com

About this Report

The Web Marketing Association has collected industry Web site development benchmark data since 1997 through its WebAward program. Multiple independent judges review and score each site from 0-10 points on each of seven criteria for a possible 70 points. Best of Industry WebAward is given to the site that scores highest in the industry. The views of this report are based on observations of aggregated industry data and do not reflect the results for any particular Web site unless noted. For complete information, go to www.webaward.org
