

Cholestatrim™ Fact Sheet

What is Cholestatrim™?

Cholestatrim is an all natural supplement that was formulated to support healthy cholesterol, inflammation, and homocysteine levels. These are 3 of the highest risk factors for heart attack and stroke, based on the latest medical research. The product is a multi-vitamin containing a broad spectrum of antioxidants, vitamins, and plant extracts that are known to support healthy cardiovascular function.

How Does It Work?

Cholestatrim™ was designed to work with the body to naturally process excess LDL cholesterol out of the blood, while supporting healthy HDL levels. In addition, Cholestatrim's proprietary blend of plant-based extracts, combined with advanced levels of antioxidants help to control inflammation in the artery walls where cholesterol can cause damage. Finally, the product's B-vitamin complex helps the body convert dangerous homocysteine into a harmless form.

Who Is Cholestatrim™ For?

Cholestatrim™ is ideal for any adult who is concerned about high cholesterol and heart health. (Check with your doctor to see if Cholestatrim™ is right for you.)

Where Is It Available?

Cholestatrim™ is only available online at www.ReduceCholesterolSafely.com

Resveratrol (from Japanese knotwood fruit skin)		

*Daily Value (DV) not established
** Percent Daily Value as based on a 2,000 calorie diet
Other ingredients: micro crystalline cellulose, magnesium stearate, gelatin capsule.

What Are The 3 Silent Heart Killers?

- 1. High Cholesterol** - most people know about this one. Almost 50% of adults have cholesterol levels higher than the recommended level from the American Heart Association. 20% of people have dangerous levels.
- 2. Inflammation in the arteries**- This is the true silent heart killer because you can't feel it, and most people don't ever get testing done to measure if it's too high. Research is now showing that inflammation is what causes most heart attacks by destabilizing plaque and cholesterol deposits in the arteries.
- 3. High Homocysteine levels** - Most people don't know what this is, and their doctors probably never even told them about it. But, homocysteine is a body by-product that raises heart attack risk significantly. There's no safe level of it.

Testimonials

"The formulation of this product is of the highest quality. The ingredients were chosen to act synergistically to offer the best opportunity for healthy cholesterol support. If you are looking for a natural alternative product to support a healthy cholesterol regime and help decrease your risk of developing cardiovascular disease, Cholestatrim™ is an excellent choice"

Dr. David Cola
