

GRAVITY DEFYER

ADVANCED TECHNOLOGY IN FOOTWEAR

Style Comfort

Powerful shock absorption technology in every step

The culmination of years of scientific research and one man's relentless passion for solving his nephew's debilitating health problem led to the invention of the world's most technologically advanced footwear, Gravity Defyers!

Tragedy Precedes Passion

In 1998, the inventor, Alex Elnekaveh's 14 year old nephew was diagnosed with a cancerous growth in his heel.

Overwhelmed by seeing his nephew suffer after heel

replacement surgery, Alex made it a mission to help him.

Inspired, Alex created the Impact Research Technology Lab to develop a shoe that would be comfortable for his nephew to walk in without pain.

One 6mm (1/8") shock absorber placed under the center of the heel releases its reciprocating resistance power each time you step and two other shocks to either side of the central one keep you balanced.

What is the Gravity Defyer?

Gravity Defyers are scientifically constructed footwear with a patented shock absorption system. Three shock absorbers in every sole give Gravity Defyers ultimate comfort and stability. With each step the hidden shocks absorb harmful stressors.

Ease Joint Pain and Pressure on Your Spine

The world's most stylish and comfortable footwear is now yours to own. The combination of lightweight rubber and cushy durable springs reduce the impact and force gravity has on your entire body making each step smooth and comfortable much like a suspension system reduces the impact on an automobile.

Have a More Active Lifestyle

As soon as you slip your feet into Gravity Defyers, you feel energized as the scientifically designed springs push you from your heels to your toes and put you in constant movement. With all this extra activity in your life you may even find yourself losing inches around your waist.

Appear Nearly 2" Taller

The hidden 6mm (1/8") shock absorbers provide you with an extra boost in height. You will gain nearly two inches of height without looking like you are wearing platform or elevator shoes.

Look like a Million Dollars

Designed by the best shoe designers from three continents, Gravity Defyers provide you with all the sophistication and comfort needed to keep up with the best of styles and trends.

Exquisitely Handcrafted

Each Gravity Defyer is handcrafted using the finest leather, materials, and components from around the world. Every Gravity Defyer is sewn by hand, ensuring the attention to detail necessary to construct the most stylish comfortable footwear in the world!

Walk with comfort. Be active.

Wear it and you'll know!
