

This Mother's Day, why not give your mom — or a woman you care about — a gift that will last: good health. Texas Oncology makes it simple to show you care, with personalized e-postcards to remind a mom in your life that simple screenings once a year are easy and essential ways to stay healthy.

- 🌸 Breast cancer is the second-leading cause of death in women.
- 🌸 As more women are screened, deaths from cervical cancer and breast cancer have declined steadily due to prevention and early detection.
- 🌸 When detected early before it spreads, women with breast or cervical cancer have a more than 90-percent survival rate after five years.

So don't wait! Go online to HealthyMothersDay.com to send a fun, light-hearted e-postcard reminder this Mother's Day!
