

◀ Make the switch to Renewable Energy ▶

villagegreen

Village Green believes that by developing renewable energy, improving existing power generating methods, and improving overall energy efficiency, the global community can achieve higher living standards without destroying our environment.

renewable energy

 Go beyond fossil fuels

Choose Renewable Energy

Village Green Energy makes it cheap and easy for households, businesses, and organizations to make the switch to renewable energy. You continue to receive bills from your utility in combination with Village Green.

- Go carbon neutral
- Stop supporting fossil fuels
- Drive the movement to build more renewables

How It Works

Village Green enables its customers to go green through the purchase of Renewable Energy Certificates (RECs). Renewable Energy Certificates are a new and innovative tool that allow companies, organizations, and individuals to purchase renewable energy without installing expensive solar panels on their roof or building a power line to connect themselves to a wind farm. As a result, purchasing RECs are the cheapest and easiest way to "go green" or "carbon neutral." Best of all, you can follow your purchase back to the source. Village Green will tell you exactly where your RECs come from.

Whether you want to power some or all of your operations with renewable electricity, Village Green will make it easy and affordable.

How much will it cost?

Prices vary, but Village Green delivers renewable energy as cheaply as we can. You can expect to pay between 1 and 2¢/kWh - a small price for clean renewable power! Give us a call or visit our website to get updated prices or a customized quote.

What Does My Purchase Include?

First and foremost, you get renewable energy instead of fossil fuel energy.

In addition, you will receive a professionally designed certificate for the amount of your purchase, fit for framing. Village Green will issue a press release and publicize your purchase on our website. Village Green is also happy to accommodate specific requests for signage or other forms of publicity for your purchase or renewable energy.

LIVE GREEN

Who Buys Renewable Energy Certificates?

Universities, companies, organizations and individuals across America are purchasing Renewable Energy Certificates. Some buyers you may have heard of are Al Gore, Whole Foods Markets, the University of Pennsylvania, Johnson & Johnson, the City of San Diego, and many more. Join the movement!

Who Supports Renewable Energy Certificates?

Leading environmental organizations like the Natural Resources Defense Council, Sierra Club, and Environmental Defense all support Renewable Energy Certificates. Visit their websites to learn more!
